INDEX

AKERS, O. P.

On the Congruence of Axes in a Bundle of Linear Line Complexes, **29**, 23–47.

ALLEN, F. E.

Closure of the Tangential Process on the Rational Plane Cubic, **49**, 456–461.

ALVORD, BENJAMIN

The Intersection of Circles and the Intersection of Spheres, **5**, 25–44. (Errata, **5**, 384).

AMES, L. D.

An Arithmetic Treatment of Some Problems in Analysis Situs, **27**, 343–380.

APPELL, PAUL

Surfaces telles que l'origine se projette sur chaque normale au milieu des centres de courbure principaux, **10**, 175–186.

De l'homographie en mécanique, **12**, 103–114.

Sur les lois de forces centrales faisant décrire à leur point d'application une conique quelles que soient les conditiones initiales, **13**, 153–158.

Sur une expression nouvelle des fonctions elliptiques par le quotient de deux séries, **14**, 9–14.

Sur une transformation de mouvements, **17**, 1–5.

Exemples d'inversion d'intégrales doubles, **19**, 377–380.

AYRES, W. L.

Concerning Subsets of a Continuous Curve which Can be Connected through the Complement of the Continuous Curve, **50**, 521–534.

BACON, CLARA LATIMER

The Cartesian Oval and the Elliptic Functions p and σ, **35**, 261–280.

BAKER, ARTHUR LATHAM

Algebraic Symbols, **18**, 62–73.

Elementary Proof of Cauchy's Theorem, **21**, 24.

BAKER, FRANCES E.

Compound Statements on Four Classes, **50**, 195–208.

BAKER, H. F.

On the Hyperelliptic Sigma Functions, **20**, 301–384.

BAKER, MARCUS

Alhazen's Problem; its Bibliography and an Extension of the Problem, **4**, 327–331.

BALLANTINE, CONSTANCE R.

Modular Invariants of a Binary Group with Composite Modulus, **45**, 286–293.

BARCROFT, DAVID

Forms of Non-singular Quintic Curves, **10**, 131–140.

BARNETT, I. A.

Differential Equations with a Continuous Infinitude of Variables, **44**, 172–190.

Linear Partial Differential Equations with a Continuous Infinitude of Variables, **45**, 42–53.

On a Class of Invariant Subgroups of the Conformal and Projective Groups in Function Space, **46**, 201–214.

BARNEY, IDA

An Extension of Green's Theorem, **36**, 137–150.

BARTON, HELEN

A Modern Presentation of Grassmann's Tensor Analysis, **49**, 598–614.

BASSET, A. B.

On the Steady Motion of an Annular Mass of Rotating Liquid, **11**, 172–181.

On Toroidal Functions, **15**, 287–302.

Waves and Jets in a Viscous Liquid, **16**, 93–110.

On the Deformation of Thin Elastic Plates and Shells, **16**, 254–290.

On the Deformation of Thin Elastic Wires, **17**, 281–317.

Theories of the Action of Magnetism on Light, **19**, 60–74.

On Certain Conics Connected with Trinodal Quartics, **26**, 169–176.

BATEMAN, H.

Some Geometrical Theorems Connected with Laplace's Equation and the Equation of Wave Motion, **34**, 325–360.

The Double Tangents of a Binodal Quartic, **35**, 57–78.

The Quartic Curve and its Inscribed Configurations, **36**, 357–386.

On a Porism Connected with the Theory of Maxwell's Equations and a Method

of Obtaining the Lines of Electric Force Due to a Moving Point Charge, **37**, 192–194.

Algebraic and Transcendental Equations Connected with the Form of Stream Lines, **48**, 277–297.

BEAL, FREDERICK WAHN

Normal Congruences Determined by Centers of Geodesic Curvature, **35**, 10–36.

BEATTY, SAMUEL

Derivation of the Complementary Theorem from the Riemann-Roch Theorem, **39**, 257–262.

BEETLE, RALPH DENNISON

Congruences Associated with a One-Parameter Family of Curves, **37**, 281–308.

BELL, E. T.

On the Representations of Numbers as Sums of 3, 5, 7, 9, 11, and 13 Squares, **42**, 168–188.

An Arithmetical Dual of Kummer's Quartic Surface, **44**, 1–11.

A Class of Numbers Connected with Partitions, **45**, 73–82.

On Class Number Relations for Bilinear Forms in Four Variables, **45**, 255–258.

On Generalizations of the Bernoullian Functions and Numbers, **47**, 277–288.

Reduction Formulas for the Number of Representations of Integers in Certain Quadratic Forms, **49**, 57–66.

Numerical Functions of Multipartite Integers and Compound Partitions, **49**, 489–510.

BENDER, HARRY ALBERT

Sylow Subgroups in the Group of Isomorphisms of Prime Power Abelian Groups, **45**, 223–250.

BENNETT, ELIZABETH RUTH

Primitive Groups with a Determination of the Primitive Groups of Degree 20, **34**, 1–20.

Simply Transitive Primitive Groups whose Maximal Subgroup Contains a Transitive Constituent of Order p^2, or pq, or a Transitive Constituent of Degree 5, **36**, 134–136.

BENNETT, THEODORE LAKE

Mapping by Means of Linear Systems of Curves Invariant under Cremona Involutions, **48**, 257–276.

BERNSTEIN, B. A.

Representation of Three-element Algebras, **46**, 110–116.

BERRY, ARTHUR

On Elliptic Modular Equations for Transformations of Orders 29, 31, 37, **30**, 156–169.

Note on Schläfli's Elliptic Modular Equations, **43**, 186–188.

BIRKHOFF, GEORGE D.

The Reducibility of Maps, **35**, 115–128.

Stability and the Equations of Dynamics, **49**, 1–38.

BLAKE, E. M.

Upon the Ruled Surfaces Generated by the Plane Movements whose Centrodes are Congruent Conics Tangent at Homologous Points, **21**, 257–269.

The Ellipsograph of Proclus, **22**, 146–153.

BLICHFELDT, H. F.

On a Certain Class of Groups of Transformation in Space of Three Dimensions, **22**, 113–120.

On the Functions Representing Distances and Analogous Functions, **25**, 331–348.

BLISS, G. A.

Generalizations of Geodesic Curvature and a Theorem of Gauss Concerning Geodesic Triangles, **37**, 1–18.

BLUMBERG, HENRY

On Certain Saltus Equations, **41**, 183–190.

BLUMENTHAL, LEONARD M.

Lagrange Resolvents in Euclidean Geometry, **49**, 511–522.

BÔCHER, MAXIME

On the Differential Equation $\Delta u + k^2 u = 0$, **15**, 78–83.

Simplification of Gauss's Third Proof that Every Algebraic Equation Has a Root, **17**, 266–268.

On Systems of Linear Differential Equations of the First Order, **24**, 311–318.

BOHANNAN, R. D.

Simple Proof of a Fundamental Theorem in the Theory of Functions, **19**, 182.

BOLZA, OSKAR

On Binary Sextics with Linear Transformations into Themselves, **10**, 47–70.

On the Construction of Intransitive Groups, **11**, 195–214.
On the Theory of Substitution-Groups and its Applications to Algebraic Equations, **13**, 59–144.
On the Transformation of Linear Differential Equations of the Second Order with Linear Coefficients, **15**, 264–273.
On the First and Second Logarithmic Derivatives of Hyperelliptic $\mathfrak{S}$-Functions, **17**, 11–36.
The Partial Differential Equations for the Hyperelliptic Θ- and $\mathfrak{S}$-Functions, **21**, 107–125.
Proof of Brioschi's Recursion Formula for the Expansion of the Even $\mathfrak{S}$-Functions of Two Variables, **21**, 175–190.
Remarks Concerning the Expansions of the Hyperelliptic Sigma-Functions, **22**, 101–112.
The Determination of the Conjugate Points for Discontinuous Solutions in the Calculus of Variations, **30**, 209–221.

BORDEN, R. F.

On the Laplace-Poisson Mixed Equation, **42**, 257–278.

BÖRGER, R. L.

On the Determination of the Ternary Modular Groups, **32**, 289–298.

BOUTON, CHARLES L.

Invariants of the General Linear Differential Equation and their Relation to the Theory of Continuous Groups, **21**, 25–84.

BOYD, PAUL PRENTICE

On the Perspective Jonquières Involutions Associated with the (2, 1) Ternary Correspondence, **34**, 291–324.

BRAHANA, H. R.

Regular Maps on an Anchor Ring, **48**, 225–240.
Regular Maps and Their Groups, **49**, 268–284.
Certain Perfect Groups Generated by Two Operators of Orders Two and Three, **50**, 345–356.

BRAHANA, H. R. (and COBLE, A. B.)

Maps of Twelve Countries with Five Sides with a Group of Order 120 Containing an Ikosahedral Subgroup, **48**, 1–20.

BRAMBLE, C. C.

A Collineation Group Isomorphic with the Group of the Double Tangents of the Plane Quartic, **40**, 351–365.

BRAY, H. E. (and EVANS, G. C.)

A Class of Functions Harmonic within the Sphere, **49**, 153–180.

BRIOSCHI, FRANCESCO

Sur une forme nouvelle de l'équation modulaire du huitième dégré, **13**, 381–386.

BROMWICH, T. J. I'A.

Congruent Reductions of Bilinear Forms, **23**, 235–258.
The Caustic, by Reflection, of a Circle, **26**, 33–44.

BROWN, ERNEST W.

On the Part of the Parallactic Inequalities in the Moon's Motion which is a Function of the Mean Motions of the Sun and Moon, **14**, 141–160.
The Elliptic Inequalities in the Lunar Theory, **15**, 244–263; **15**, 321–338.
Investigations in the Lunar Theory, **17**, 318–358.

BRYAN, G. H.

On Certain Applications of the Theory of Probability to Physical Phenomena, **19**, 283–288.

BUCHANAN, DANIEL

Periodic Orbits on a Smooth Surface, **37**, 79–94.
Oscillations near an Isoceles-Triangle Solution of the Problem of Three Bodies as the Finite Masses Become Unequal, **39**, 41–58.
Asymptotic Satellites near the Straight-Line Equilibrium Points in the Problem of Three Bodies, **41**, 79–110.
Periodic Orbits on a Surface of Revolution, **42**, 47–75.

BUCHANAN, H. E.

Periodic Oscillations of Three Finite Masses about the Lagrangian Circular Solutions, **45**, 93–121.
The Construction of Certain Periodic Orbits of the Three Body Problem, **47**, 289–301.
Periodic Orbits of Three Finite Masses about the Equilateral Triangle Points, **50**, 613–626.

BUCHANAN, MARGARET

Systems of Two Linear Integral Equations with Two Parameters and Symmetrizable Kernels, **45**, 155–185.

BUCHHEIM, ARTHUR

Memoir on Biquaternions, **7**, 293–326. (Errata, **7**, iv).

BULLARD, J. A.

On the Structure of Finite Continuous Groups, **39**, 430–450.

BURGESS, R. W.

The Uniform Motion of a Sphere through a Viscous Liquid, **38**, 81–96.

BURNS, JOSEPHINE E.

The Abstract Definitions of Groups of Degree 8, **37**, 195–214.

BURR, WILLIAM H.

On the Theory of Flexure, **2**, 13–45.
Note to the Article "On the Theory of Flexure," **2**, 191.

BUTTS, WILLIAM H.

The Elliptic Cylinder Function of Class K, **30**, 129–155.

CAJORI, FLORIAN

On the Multiplication of Semi-convergent Series, **15**, 339–343.
On the Multiplication and Involution of Semi-convergent Series, **18**, 195–209.

CAMP, BURTON H.

Multiple Integrals over Infinite Fields, and the Fourier Multiple Integral, **39**, 311–334.

CAMP, CHESTER CLAREMONT

An Extension of the Sturm-Liouville Expansion, **44**, 25–53.
An Expansion Involving p Inseparable Parameters Associated with a Partial Differential Equation, **50**, 259–268.

CAMPBELL, ALAN D.

Pencils of Conics in the Galois Fields of Order 2^n, **49**, 401–406.
Nets of Conics in the Real Domain, **50**, 459–466.

CARMAN, M. G.

The Expansion Problem for a Certain System of Ordinary Linear Second Order Differential Equations, **48**, 169–182.

CARMICHAEL, R. D.

A Table of the Values of m Corresponding to Given Values of $\Phi(m)$, **30**, 394–400.

The General Theory of Linear q-Difference Equations, **34**, 147–168.

Linear Mixed Equations and their Analytic Solutions, **35**, 151–162.

On the Theory of Linear Difference Equations, **35**, 163–182.

On Non-Homogeneous Equations with an Infinite Number of Variables, **36**, 13–20.

On Series of Iterated Linear Fractional Functions, **36**, 267–288.

On the Solutions of Linear Homogeneous Difference Equations, **38**, 185–220.

On the Asymptotic Character of Functions Defined by Series of the Form $\Sigma c_n g(x+n)$, **39**, 385–403.

On the Representation of Functions in Series of the Form $\Sigma c_n g(x+n)$, **40**, 113–126.

On the Convergence of Certain Classes of Series of Functions, **42**, 77–90.

Boundary Value and Expansion Problems: Algebraic Basis of the Theory, **43**, 69–101.

Boundary Value and Expansion Problems: Formulation of Various Transcendental Problems, **43**, 232–270.

Boundary Value and Expansion Problems: Oscillation, Comparison and Expansion Theorems, **44**, 129–152.

Transformations Leaving Invariant Certain Partial Differential Equations of Physics, **49**, 97–116.

CARPENTER, A. F.

A Theorem for the Development of a Function as an Infinite Product, **35**, 105–114.

Projective Properties of a Ruled Surface in the Neighborhood of a Ruling, **46**, 241–257.

CARSLAW, H. S.

A Trigonometrical Sum and the Gibbs' Phenomenon in Fourier's Series, **39**, 185–198.

CARTAN, E.

Sur la réduction à sa forme canonique de la structure d'un groupe de transformations fini et continu, **18**, 1–61.

CARVER, WALTER B.

The Quadric Spreads Connected with the Configuration $\Gamma^{n+2}_{n+4,n}$, and a Special Case in the Pascal Hexagram, **31**, 1–17.

The Failure of the Clifford Chain, **42**, 137–167. (Errata, **42**, 286.)

CAYLEY, A.

Desiderata and Suggestions:

No. 1. The Theory of Groups, **1**, 50–52.
No. 2. The Theory of Groups: Graphical Representation, **1**, 174–176.
No. 3. The Newton-Fourier Imaginary Problem, **2**, 97.
No. 4. Mechanical Construction of Conformable Figures, **2**, 186.

Link-work for x^2, **1**, 386.
Calculation of the Minimum N. G. F. of the Binary Seventhic, **2**, 71–84. (Errata, **2**, iv).
On the 34 Concomitants of the Ternary Cubic, **4**, 1–15.
Specimen of a Literal Table for Binary Quantics, otherwise a Partition Table, **4**, 248–255.
On the Analytical Forms Called Trees, **4**, 266–268.
On the 8-square Imaginaries, **4**, 293–296.
Tables for the Binary Sextic (The Leading Coefficients of the First 18 of the 26 Covariants), **4**, 379–384.
A Memoir on the Abelian and Theta-Functions, **5**, 137–179; **7**, 101–167.
Note on a Partition Series, **6**, 63–64.
A Memoir on Seminvariants, **7**, 1–25. (Errata, **7**, iv).
Tables of the Symmetric Functions of the Roots, to the Degree 10, for the Form $1 + bx + cx^2/1.2 + \cdots = (1 - \alpha x)(1 - \beta x)(1 - \gamma x) \cdots$, **7**, 47–56.
Non-Unitary Partition Tables, **7**, 57–58.
Seminvariant Tables, **7**, 59–73.
On the Transformation of Elliptic Functions, **9**, 193–224; **10**, 71–93.
On the Surfaces with Plane or Spherical Curves of Curvature, **11**, 71–98; 293–306.
On the Theory of Groups, **11**, 139–157.
On a Soluble Quintic Equation, **13**, 53–58.
Corrected Seminvariant Tables for the Weights 11 and 12, **14**, 195–200.
On Symmetric Functions and Seminvariants, **15**, 1–74.
Tables of Pure Reciprocants to the Weight 8, **15**, 75–77.
Note on the So-called Quotient G/H in the Theory of Groups, **15**, 387–388.

CHACE, A. B.

A Certain Class of Cubic Surfaces Treated by Quaternions, **2**, 315–323.

CHAPMAN, C. H.

On Some Applications of the Units of an n-fold Space, **10**, 225–242.
On the Matrix which Represents a Vector, **13**, 363–380.
Application of Quaternions to Projective Geometry, **14**, 115–140.

CHESSIN, ALEXANDER S.

Summation of Logarithmic and Exponential Series, **16**, 164–185. (Corrections, **16**, 290.)
Note on the General Solution of Bessel's Equation, **16**, 186–187.
On Foucault's Pendulum, **17**, 81–88.
On a Point of the Theory of Functions, **18**, 98.
On Non-uniform Convergence of Infinite Series, **18**, 128–129.
On the Analytic Theory of Circular Functions, **19**, 217–258.
On a Class of Differential Equations, **27**, 103–112.

CHITTENDEN, E. W.

On the Equivalence of Relations $K_{a_1 a_2 m}$, **39**, 263–271.
On a Theorem in General Analysis and the Interrelations of Eight Fundamental Properties of Classes of Functions, **44**, 153–162.

CHREE, C.

Isotropic Elastic Solids of Nearly Spherical Form, **16**, 299–396; **19**, 121–154.

CLIFFORD, W. K.

Remarks on the Chemico-Algebraical Theory (Extract from a Letter to Mr. Sylvester), **1**, 126–128.
Applications of Grassmann's Extensive Algebra, **1**, 350–358.

COAR, HENRY LIVINGSTON

Functions of Three Real Independent Variables, **28**, 243–332.

COBLE, ARTHUR B.

Collineations whose Characteristic Determinants Have Linear Elementary Divisors with an Application to Quadratic Forms, **27**, 25–46.
An Invariant Condition for Certain Automorphic Algebraic Forms, **28**, 333–366.
Symmetric Binary Forms and Involutions, **31**, 183–212; **31**, 355–364; **32**, 333–364.
Restricted Systems of Equations, **36**, 167–186.
Restricted Systems of Equations (Second Paper), **36**, 395–418.
Theta Modular Groups Determined by Point Sets, **40**, 317–340.
The Ten Nodes of the Rational Sextic and of the Cayley Symmetroid, **41**, 243–265.

Multiple Binary Forms with the Closure Property, **43**, 1–19.
Geometric Aspects of the Abelian Modular Functions of Genus Four, **46**, 143–192.

COBLE, A. B. (and BRAHANA, H. R.)

Maps of Twelve Countries with Five Sides with a Group of Order 120 Containing an Ikosahedral Subgroup, **48**, 1–20.

COBLE, A. B. (and MORLEY, F.)

New Results in Elimination, **49**, 463–488.

COHEN, TERESA

The Asymptotic Equation and Satellite Conic of the Plane Quartic, **38**, 325–336.
A Comitant Curve of the Plane Quartic, **39**, 221–232.
Investigations on the Plane Quartic, **41**, 191–211.

COLE, F. N.

A Contribution to the Theory of the General Equation of the Sixth Degree, **8**, 265–286.
Klein's Ikosaeder, **9**, 45–61.
On Rotations in Space of Four Dimensions, **12**, 191–210.
Simple Groups from Order 201 to Order 500, **14**, 378–388.
Simple Groups as far as Order 660, **15**, 303–315.

COLE, F. N. (and GLOVER, J. W.)

On Groups whose Orders are Products of Three Prime Factors, **15**, 191–220

COLOMB, R. E. (and HILTON, HAROLD)

On Orthoptic and Isoptic Loci, **39**, 86–94.

COLPITTS, E. C.

On Twisted Quintic Curves, **29**, 309–344.

CONNER, J. R.

Basic Systems of Rational Norm-Curves, **32**, 115–176.
The Rational Plane Quartic as Derived from the Norm-Curve in Four Dimensions by Projection and Section, **33**, 203–248.
The Rational Sextic Curve, and the Cayley Symmetroid, **37**, 29–42.
Correspondences Determined by the Bitangents of a Quartic, **38**, 155–176.

CONNER, J. R. (and MORLEY, F.)

Plane Sections of a Weddle Surface, **31**, 263–270. (Correction, **31**, ii).

COPELAND, ARTHUR H.

Admissible Numbers in the Theory of Probability, **50**, 535–552.

CORDEIRO, F. J. B.

Gyroscopes and Cyclones, **28**, 214–225.

COWELL, P. H.

On the Inclinational Terms in the Moon's Coordinates, **18**, 99–127.

COX, LEWIS C.

The Finite Groups of Birational Transformations of a Net of Cubics, **39**, 59–74.

CRAIG, THOMAS

The Motion of a Point upon the Surface of an Ellipsoid, **1**, 359–364.

The Motion of a Solid in a Fluid, **2**, 162–177.

Note on the Projection of the General Locus of Space of Four Dimensions into Space of Three Dimensions, **2**, 252–259.

On the Motion of an Ellipsoid in a Fluid, **2**, 260–279.

Orthomorphic Projection of an Ellipsoid upon a Sphere, **3**, 114–127.

On Certain Possible Cases of Steady Motion in a Viscous Fluid, **3**, 269–293.

On Certain Metrical Properties of Surfaces, **4**, 297–320.

The Counter-Pedal Surface of the Ellipsoid, **4**, 358–378..

Some Elliptic Function Formulae, **5**, 62–75. (Errata, **5**, v).

Note on the Counter-Pedal Surface of an Ellipsoid, **5**, 76–78.

On a Theta-Function Formula, **5**, 350–357.

On Quadruple Theta-Functions, **6**, 14–59; 183–204.

On Certain Groups of Relations Satisfied by the Quadruple Theta-Functions, **6**, 205–221.

On Theta-Functions with Complex Characteristics, **6**, 337–358.

On a Certain Class of Linear Differential Equations, **7**, 279–287.

On Linear Differential Equations whose Fundamental Integrals Are the Successive Derivatives of the Same Function, **8**, 85–103.

On a Linear Differential Equation of the Second Order, **8**, 180–195.

A Class of Uniform Transcendental Functions, **16**, 207–220.

On Certain Partial Differential Equations Connected with the Theory of Surfaces, **19**, 94–98.

Displacements Depending on One, Two and Three Parameters in a Space of Four Dimensions, **20**, 135–156.

CRAMLET, CLYDE M.

Applications of the Determinant and Permanent Tensors to Determinants of General Class and Allied Tensor Functions, **49**, 87–96.

CROFTON, M. W.

Generalization of Leibnitz's Theorem in Statics (Extract from a letter to Professor Sylvester), **2**, 191–192.

On Symbols of Operation, **4**, 269–271.

CURTISS, D. R.

On the Invariants of a Homogeneous Quadratic Differential Equation of the Second Order, **25**, 365–382.

DALE, JULIA

Some Properties of the Exponential Mean, **47**, 71–90.

DANIELL, P. J.

Observations Weighted According to Order, **42**, 222–236.

Integral Products and Probability, **43**, 143–162.

DANIELS, A. L.

Note on Weierstrass' Methods in the Theory of Elliptic Functions, **6**, 177–182.

Second Note on Weierstrass' Theory of Elliptic Functions, **6**, 253–269.

Third Note on Weierstrass' Theory of Elliptic Functions, **7**, 82–99.

DANTZIG, TOBIAS

Some Contributions to the Geometry of Plane Transformations, **40**, 187–212.

DATTA, BIBHUTIBHUSAN

On a Method for Determining the Non-Stationary State of Heat in an Ellipsoid, **41**, 133–142.

On the Motion of Two Spheroids in an Infinite Liquid along their Common Axis of Revolution, **43**, 134–142.

DAUS, P. H.

Normal Ternary Continued Fraction Expansions for the Cube Roots of Integers, **44**, 279–296.

DAVIS, ELLERY W.

An Expression of the Coordinates of a Point on a Bi-nodal Quartic Curve as

Rational Functions of the Elliptic Functions of a Variable Parameter, **5**, 331–336.
Geometrical Illustrations of Some Theorems in Number, **15**, 84–90.
A Note on the Factors of Composition of a Group, **19**, 191.
On the Sign of a Determinant's Term, **19**, 383.

DAVIS, H. T.

Fractional Operations as Applied to a Class of Volterra Integral Equations, **46**, 95–109.
An Extension of the Problem of the Elastic Bar, **47**, 101–120.
The Application of Fractional Operators to Functional Equations, **49**, 123–142.

DECKER, F. F.

On the Order of a Restricted System of Equations, **37**, 159–178.
On the Order of a Restricted System of Equations, **41**, 283–298.

DHAR, SASINDRACHANDRA

On Elliptic Cylinder Functions of the Second Kind, **45**, 208–221.

DICKSON, LEONARD EUGENE

Analytic Functions Suitable to Represent Substitutions, **18**, 210–218.
Determination of the Structure of All Linear Homogeneous Groups in a Galois Field which Are Defined by a Quadratic Invariant, **21**, 193–256.
Certain Subgroups of the Betti-Mathieu Group, **22**, 49–54.
Canonical Form of a Linear Homogeneous Substitution in a Galois Field, **22**, 121–137.
Concerning the Cyclic Subgroups of the Simple Group G of All Linear Fractional Substitutions of Determinant Unity in Two Non-Homogeneous Variables with Coefficients in an Arbitrary Galois Field, **22**, 231–252.
Distribution of the Ternary Linear Homogeneous Substitutions in a Galois Field into Complete Sets of Conjugate Substitutions, **23**, 37–40.
Representation of Linear Groups as Transitive Substitution Groups, **23**, 337–377.
Cyclic Subgroups of the Simple Ternary Linear Fractional Group in a Galois Field, **24**, 1–12.
Canonical Form of a Linear Homogeneous Transformation in an Arbitrary Realm of Rationality, **24**, 101–108.
Memoir on Abelian Transformations, **26**, 243–318.
Determination of the Ternary Modular Groups, **27**, 189–202.
Subgroups of Order a Power of p in the General and Special m-ary Linear Homogeneous Groups in the $GF[p^n]$, **27**, 280–302.

On the Quarternary Linear Homogeneous Groups Modulo p of Order a Multiple of p, **28**, 1–16.
On the Canonical Forms and Automorphs of Ternary Cubic Forms, **30**, 117–128.
Invariantive Reduction of Quadratic Forms in the $GF[2^n]$, **30**, 263–281.
Rational Reduction of a Pair of Binary Quadratic Forms; their Modular Invariants, **31**, 103–146.
A Theory of Invariants, **31**, 237–354.
Binary Modular Groups and their Invariants, **33**, 175–192.
Finiteness of the Odd Perfect and Primitive Abundant Numbers with n Distinct Prime Factors, **35**, 413–422.
Even Abundant Numbers, **35**, 423–426.
Invariantive Theory of Plane Cubic Curves Modulo 2, **37**, 107–116.
Geometrical and Invariantive Theory of Quartic Curves Molulo 2, **37**, 337–354.
Invariantive Classification of Pairs of Conics Modulo 2, **37**, 355–358.
Algebraic Theory of the Expressibility of Cubic Forms as Determinants, with Application to Diophantine Analysis, **43**, 102–125.
On the Theory of Numbers and Generalized Quaternions, **46**, 1–16.
Quaternary Quadratic Forms Representing All Integers, **49**, 39–56.
Generalizations of Waring's Theorem on Fourth, Sixth and Eighth Powers, **49**, 241–250.
Additive Number Theory for All Quadratic Functions, **50**, 1–48.

DINES, LLOYD L.

The Highest Common Factor of a System of Polynomials in One Variable, **35**, 129–150.
A Primary Classification of Projective Transformations in Function Space, **44**, 87–101.
On Certain Symmetric Sums of Determinants, **47**, 249–256.

DIXON, T. S. E.

A New Solution of Biquadratic Equations, **1**, 283–284.

DODD, EDWARD L.

The Convergence of General Means and the Invariance of Form of Certain Frequency Functions, **49**, 215–220.

DUHEM, P.

Sur la pression dans les milieux diélectriques ou magnétiques, **17**, 117–167.

DURFE, WILLIAM PITT

Tables of the Symmetric Functions of the Twelfthic, **5**, 45–61. (Errata, **5**, v).

The Tabulation of Symmetric Functions, **5**, 348–349.
Symmetric Functions of the 14ic, **9**, 278–296.

ECHOLS, W. H.

A Deduction and Demonstration of Taylor's Formula, **15**, 283–284.
On the Expansion of Functions in Infinite Series, **15**, 316–320.

EDDY, HENRY T.

The Theorem of Three Moments, **1**, 27–31.
The Elastic Arch, **1**, 241–244.
On the Two General Reciprocal Methods in Graphical Statics, **1**, 322–335.
On the Lateral Deviation of Spherical Projectiles, **2**, 85–88.

EIESLAND, JOHN

Note on the Integration of a Certain System of Differential Equations, **20**, 245–252.
On Nullsystems in Space of Five Dimensions and their Relation to Ordinary Space, **26**, 103–148.
On the Integration of a System of Differential Equations in Kinematics, **28**, 17–42.
On a Certain Class of Algebraic Translation-Surfaces, **29**, 363–386.
On Translation-Surfaces Connected with a Unicursal Quartic, **30**, 170–208.
On a Class of Cubic Surfaces with Curves of the Same Species, **33**, 1–28.
On a Flat Spread-Sphere Geometry in Odd-dimensional Space, **35**, 201–228.
Flat-Sphere Geometry, **40**, 1–46.

EISENHART, LUTHER PFAHLER

Infinitesimal Deformation of Surfaces, **24**, 173–204.
Isothermal-Conjugate Systems of Lines on Surfaces, **25**, 213–248.
Surfaces whose Lines of Curvature in One System are Represented on the Sphere by Great Circles, **25**, 349–364.
Surfaces of Constant Mean Curvature, **25**, 383–396.
Congruences of Tangents to a Surface and Derived Congruences, **26**, 180–208.
Surfaces with the Same Spherical Representation of their Lines of Curvature as Pseudospherical Surfaces, **27**, 113–172.
Certain Surfaces with Plane or Spherical Lines of Curvature, **28**, 47–70.
Certain Triply Orthogonal Systems of Surfaces, **29**, 168–212.
Surfaces with the Same Spherical Representation of their Lines of Curvature as Spherical Surfaces, **30**, 19–42.
The Twelve Surfaces of Darboux and the Transformation of Moutard, **32**, 17–36.

Minimal Surfaces in Euclidean Four-Space, **34**, 215–236.
One-Parameter Families of Curves, **37**, 179–191.
Transformations of Planar Nets, **40**, 127–144.

ELLIOTT, W. W.

Generalized Green's Functions for Compatible Differential Systems, **50**, 243–258.

ELY, G. S.

Bibliography of Bernoulli's Numbers, **5**, 228–235.
Some Notes on the Numbers of Bernoulli and Euler, **5**, 337–341.
The Method of Graphs Applied to Compound Partitions, **6**, 382–384.

EMCH, ARNOLD

Some Properties of Closed Convex Curves in a Plane, **35**, 407–412.
On Some Properties of the Medians of Closed Continuous Curves Formed by Analytic Arcs, **38**, 6–18.
On the Medians of a Closed Convex Polygon, **37**, 19–28.
Proof of Pohlke's Theorem and its Generalizations by Affinity, **40**, 366–374.
On a Certain Class of Rational Ruled Surfaces, **42**, 189–210.
Incidences of Straight Lines and Plane Algebraic Curves and Surfaces Generated by Them, **44**, 12–19.
Some Geometric Applications of Symmetric Substitution Groups, **45**, 192–207.
On Surfaces and Curves which Are Invariant under Involutory Cremona Transformations, **48**, 21–44.

ENGLER, E. A. (and HOLMAN, M. L.)

The Tangent to the Parabola, **1**, 379–383. (Erratum, **2**, iv).

EPSTEEN, SAUL

Untersuchungen über lineare Differentialgleichungen 4. Ordnung und die zugehörigen Gruppen, **25**, 123–156.
Derivative Domains of Rationality, **34**, 69–88.

EPSTEEN, SAUL (and LEONARD, HEMAN BURR)

On the Definition of Reducible Hypercomplex Number Systems, **27**, 217–242.

ETTLINGER, H. J.

On Multiple Iterated Integrals, **48**, 215–222.

EVANS, GRIFFITH C.

The Non-homogeneous Differential Equation of Parabolic Type, **37**, 431–438.
Note on a Theorem of Bôcher, **50**, 123–126.
Generalized Neumann Problems for the Sphere, **50**, 127–138.

EVANS, GRIFFITH C. (and BRAY, H. E.)

A Class of Functions Harmonic within the Sphere, **49**, 153–180.

FAÀ DE BRUNO

Notes on Modern Algebra, **3**, 154–163. (Errata, **3**, v).

Quelques applications de la théorie des formes binaires aux fonctions elliptiques, **5**, 1–24.

Sur le développement des fonctions rationelles, **5**, 238–240.

Démonstration directe de la formule Jacobienne de la transformation cubique, **10**, 169–172.

FARNUM, FAY

On Triadic Cremona Nets of Plane Curves, **50**, 357–370.

FERRY, FREDERICK C.

Geometry on the Cubic Scroll of the Second Kind, **23**, 179–234.

Geometry on the Cuspidal Cubic Cone, **25**, 269–300.

FIELD, PETER

On the Forms of Unicursal Quintic Curves, **26**, 149–163.

Quintic Curves for which $P = 1$, **27**, 243–247.

On Constrained Motion, **36**, 21–30.

On a Rational Plane Quintic Curve with Four Real Cusps, **46**, 235–240.

FIELDS, J. C.

A Proof of the Theorem—The Equation $f(z) = 0$ Has a Root where $f(z)$ Is Any Holomorphic Function of z, **8**, 178–179.

A Proof of the Elliptic-Function Addition-Theorem, **8**, 287–288.

Symbolic Finite Solutions and Solutions by Definite Integrals of the Equation $d^n y/dx^n = x^m y$, **8**, 367–388.

The Expression of Any Differential Coefficient of a Function of a Function of Any Number of Variables by Aid of the Corresponding Differential Coefficients of Any n Powers of the Function, where n Is the Order of the Differential Coefficient, **11**, 388–396.

A Simple Statement of Proof of Reciprocal-Theorem, **13**, 189–190.

Related Expressions for Bernoulli's and Euler's Numbers, **13**, 191–192.

Transformation of a System of Independent Variables, **14**, 230–236.

The Complementary Theorem, **32**, 1–16.

FIELDS, J. C. (and NIXON, H. B.)

Bibliography of Linear Differential Equations, **7**, 353–363.

FINE, HENRY B.

On the Singularities of Curves of Double Curvature, **8**, 156–177.

A Theorem Respecting the Singularities of Curves of Multiple Curvature, **9**, 180-184.

On the Functions Defined by Differential Equations, with an Extension of the Puiseux Polygon Construction to these Equations, **11**, 317–328.

Singular Solutions of Ordinary Differential Equations, **12**, 295–322.

FISCHER, CHARLES ALBERT

A Generalization of Volterra's Derivative of a Function of a Curve, **35**, 369–394.

The Derivative of a Function of a Surface, **36**, 289–306.

Functions of Surfaces with Exceptional Points or Curves, **38**, 259–266.

Equations Involving the Partial Derivatives of a Function of a Surface, **39**, 123–134.

On the Kernel of the Stieltjes Integral Corresponding to a Completely Continuous Transformation, **44**, 237–246.

FORD, WALTER B.

On the Relation between the Sum-Formulas of Hölder and Cesàro, **32**, 315–326.

On the Representation of Arbitrary Functions by Definite Integrals, **38**, 397–406.

FORSYTH, A. R.

Systems of Ternariants that Are Algebraically Complete, **12**, 1–60; 115–160.

FORT, TOMLINSON

Limited and Illimited Linear Difference Equations of the Second Order with Periodic Coefficients, **37**, 43–54.

Linear Difference and Differential Equations, **39**, 1–26.

FRANKLAND, A.

Remarks on Chemico-Graphs (Extract from a letter to Mr. Sylvester), **1**, 345–349.

FRANKLIN, F.

Bipunctual Coordinates, **1**, 148–173.

On a Problem of Isomerism, **1**, 365–368.

Note on Indeterminate Exponential Forms, **1**, 368–369.

Note on Partitions, **2**, 187–188.

On the Calculation of the Generating Functions and Tables of Groundforms for Binary Quantics, **3**, 128–153.

Note on the Intersections of Two Curves, **3**, 192.

On Newton's Method of Approximation, **4**, 275–276.
On Cubic Curves, **5**, 212–217.
Note on "The Development of an Algebraic Fraction," **6**, 288.
Note on the Theorem $e^{ix} = \cos x + i \sin x$, **7**, 376.
Proof of a Theorem of Tchebycheff's on Definite Integrals, **7**, 377–379.
Two Proofs of Cauchy's Theorem, **9**, 389–390.
Some Theorems Concerning the Centre of Gravity, **10**, 368–370.
Note on the Double Periodicity of the Elliptic Functions, **11**, 283–292.
On Some Applications of Circular Coordinates, **12**, 161–190.
On Confocal Bicircular Quartics, **12**, 323–336.
Note on Induced Linear Substitutions, **16**, 205–206.
Note on Linear Differential Equations with Constant Coefficients, **19**, 92–93.

FRANKLIN, F. (and SYLVESTER, J. J.)

Tables of the Generating Functions and Groundforms for the Binary Quantics of the First Ten Orders, **2**, 223–251.
Tables of the Generating Functions and Groundforms for Simultaneous Binary Quantics of the First Four Orders, Taken Two and Two together, **2**, 293–306.
A Constructive Theory of Partitions, **5**, 251–330. (Errata, **5**, v-vi).

FRANKLIN, PHILIP

The Four Color Problem, **44**, 225–236.

FRARY, HOBART DICKINSON

The Green's Function for a Plane Contour, **42**, 11–25.

FRÉCHET, MAURICE

L'expression la plus générale de la "distance" sur une droite, **47**, 1–10.
Démonstration de quelques propriétés des ensembles abstraits, **50**, 49–72.

FREELAND, FRANK T.

Linkages for x^m, **3**, 316–319.

FRISCHAUF, I.

Bemerkungen zu C. S. Peirce Quincuncial Projection, **19**, 381–382.

GARABEDIAN, CARL A.

Rods of Constant or Variable Circular Cross Section, **46**, 273–287.

GARRETSON, W. VAN N.

On the Asymptotic Solution of the Non-Homogeneous Linear Differential Equation of the n-th Order. A Particular Solution, **40**, 341–350.

DE GASPARIS, A.

Extract of a Letter to Mr. Sylvester, **2**, 99–100.

GEHMAN, HARRY MERRILL

Irreducible Continuous Curves, **49**, 189–196. (Corrections, **49**, 636.)

GERGEN, JOHN J.

On Generalized Lacunae, **49**, 407–418.

GERGEN, J. J. (and WIDDER, D. V.)

On Taylor's Series Admitting the Circle of Convergence as a Singular Curve, **50**, 139–146.

GIBBS, J. W.

On the Fundamental Formulae of Dynamics, **2**, 49–64. (Errata, **2**, iv).

GILESPIE, WILLIAM

On the Reduction of Hyperelliptic Integrals ($p = 3$) to Elliptic Integrals by Transformations of the Second and Third Degrees, **22**, 257–278.

GLASHAN, J. C.

An Extension of Taylor's Theorem, **1**, 287–288.

Change of the Independent Variable, **3**, 190–191.

Simple and Uniform Method of Obtaining Taylor's, Cayley's, and Lagrange's Series, **4**, 277–281.

Forms of Rolle's Theorem, **4**, 282–292.

Notes on the Quintic, **7**, 178–179.

Quinquisection of the Cyclotomic Equation, **21**, 270–275.

On the m-Fold Section of the Cyclotomic Equation in the Case of m Prime, **21**, 276–285.

On the Determination and Solution of the Metacyclic Quintic Equations with Rational Coefficients, **23**, 49–56.

The Isodyadic Quintic, **45**, 251–254.

On the Isodyadic Septimic Equations, **46**, 55–69.

GLENN, OLIVER E.

The Theory of Degenerate Algebraical Curves and Surfaces, **32**, 75–100.

On the Structure of Forms, and the Algebraical Theory of n-Lines, **34**, 449–460.

Concerning an Analogy between Formal Modular Invariants and the Class of Algebraical Invariants Called Booleans, **37**, 73–78.

On the Reduction of Differential Parameters in Terms of Finite Sets, with Remarks Concerning Differential Invariants of Analytic Transformations, **46**, 37–54.

The Invariant System of Two Associated Bilinear Connexes, **48**, 45–56.
A Memoir on the Invariants of Biternary Quantics, **50**, 209–230.

GLOVER, J. W. (and COLE, F. N.)

On Groups whose Orders Are Products of Three Prime Factors, **15**, 191–220.

GOFF, JOHN A.

Transformations Leaving Invariant the Heat Equation of Physics, **49**, 117–122.

GOKHALE, VISHNU DATTATREYA

Concerning Compact Kürschák Fields, **44**, 297–316.

GOMES-TEIXEIRA, F.

Note sur les nombres de Bernoulli, **7**, 288–292.

GORTON, W. C. L.

Line Congruences, **10**, 347–367.
Systems of Rays Normal to a Surface, **13**, 173–178.

GOSSARD, HARRY CLINTON

On a Special Elliptic Ruled Surface of the Ninth Order, **38**, 431–445.

GOURSAT, E.

Surfaces telles que la somme des rayons de courbure principaux est proportionnelle à la distance d'un point fixe au plan tangent, **10**, 187–204.
Sur les solutions singulières des équations différentielles simultanées, **11**, 329–372.
Sur un problème relatif à la déformation des surfaces, **14**, 1–8.
Sur la transformation des courbes algébriques, **16**, 291–298.
Sur les équations linéaires et la méthode de Laplace, **18**, 347–385.

GRAESSER, R. F.

A Certain General Type of Neumann Expansions and Expansions in Confluent Hypergeometric Functions, **49**, 577–597.

GRAUSTEIN, WILLIAM CASPAR

On Two Related Transformations of Space Curves, **39**, 233–240.
Determination of a Surface by its Curvatures and Spherical Representation, **45**, 294–314.

GRAY, MARION CAMERON

A Boundary Value Problem of Ordinary Self-Adjoint Differential Equations with Singularities, **50**, 431–458.

GREEN, GABRIEL M.

Projective Differential Geometry of One-Parameter Families of Space Curves, and Conjugate Nets on a Curved Surface, **37,** 215–246.
Projective Differential Geometry of One-Parameter Families of Space Curves, and Conjugate Nets on a Curved Surface. Second Memoir, **38,** 287–324.

GREENHILL, A. G.

Wave Motion in Hydrodynamics, **9,** 62–112.
The Motion of a Solid in Infinite Liquid under No Forces, **20,** 1–75.
The Motion of a Solid in Infinite Liquid, **28,** 71–158.
The Attraction of a Homogeneous Spherical Segment, **33,** 373–412.
The Potential of a Lens, and Allied Physical Problems, **39,** 335–384.

GRIFFIN, FRANK LOXLEY

On the Law of Gravitation in the Binary Systems, **31,** 62–85.

GRIFFITHS, LOIS W.

Generalized Quaternion Algebras and the Theory of Numbers, **50,** 303–314.

GUNDELFINGER, GEORGE F.

On the Geometry of Line Elements in the Plane with Reference to Osculating Circles, **33,** 153–174.

HAGEN, JOHN

On Division of Series, **5,** 236–237.

HALE, A. W.

Tables for Facilitating the Determination of Empirical Formulae, **5,** 342–347.

HALL, E. H.

On a New Action of the Magnet on Electric Currents, **2,** 287–292.

HALL, T. PROCTOR

The Projection of Fourfold Figures upon a Three-Flat, **15,** 179–189.

HALSTED, GEORGE BRUCE

Bibliography of Hyper-Space and Non-Euclidean Geometry, **1,** 261–276. (Errata, **1,** iv).
Addenda to the Preceding Paper, **1,** 384–385; **2,** 65–70.
Note on the First English Euclid, **2,** 46–48.

HAMMOND, J.

On the Mechanical Description of the Cartesian, **1,** 283–284.
On General Differentiation, **3,** 164–173.

On the Solution of the Differential Equation of Sources, **5,** 218–227.
On the Syzygies of the Binary Sextic and their Relations, **7,** 327–344.
Syzygy Tables for the Binary Quintic, **8,** 19–25.
On Perpetuants, with Applications to the Theory of Finite Quantics, **8,** 104–126.
The Cubi-quadric System, **8,** 138–155.

HANCOCK, HARRIS

Primary Prime Functions in Several Variables and a Generalization of an Important Theorem of Dedekind, **24,** 39–60.

HARDY, JAMES G.

On Darboux Lines on Surfaces, **20,** 283–292.
Curves of Triple Curvature, **24,** 13–38.

HARRIS, ROLLIN A.

Note on the Use of Supplementary Curves in Isogonal Transformation, **14,** 291–300.
On Harmonic Functions, **34,** 391–420.

HART, WILLIAM L.

Linear Differential Equations in Infinitely Many Variables, **39,** 407–424.
The Cauchy-Lipschitz Method for Infinite Systems of Differential Equations, **43,** 226–231.

HASKELL, MELLEN WOODMAN

Ueber die zu der Curve $\lambda^3\mu + \mu^3\nu + \nu^3\lambda = 0$ im projectiven Sinne gehörende mehrfache Ueberdeckung der Ebene, **13,** 1–52.

HATHAWAY, ARTHUR S.

Some Papers on the Theory of Numbers, **6,** 316–330.
A Memoir in the Theory of Numbers, **9,** 162–179.

HATZIDAKIS, N. J.

Displacements Depending on One, Two, . . . , k Parameters in a Space of n Dimensions, **22,** 154–184.

HAWKES, H. E.

Estimate of Peirce's Linear Associative Algebra, **24,** 87–95.
On Hypercomplex Number Systems in Seven Units, **26,** 223–242.
The Reduction of Families of Bilinear Forms, **32,** 101–114.

HAZLETT, OLIVE C.

On the Classification and Invariantive Characterization of Nilpotent Algebras, **38,** 109–138.

Associated Forms in the General Theory of Modular Covariants, **43,** 189–198.
Notes on Formal Modular Protomorphs, **49,** 181–188.

HENNEL, CORA B.

Transformations and Invariants Connected with Linear Homogeneous Difference Equations and Other Functional Equations, **35,** 431–452.

HERMITE, C.

Sur une formule relative à la théorie des fonctions d'une variable, **6,** 60–62.
Extract from a Letter to Mr. Sylvester, **6,** 173–174.
Extrait d'une lettre addressée à M. Carlo Veneziani, **7,** 168–169.
Extraits de deux Lettres addressées à M. Craig, **9,** 381-388.
Extrait d'une lettre adressée à M. Craig, **17,** 6–10.
Sur le logarithme de la fonction gamma, **17,** 111–116.

HEUN, K.

Remarks on the Logarithmic Integrals of Regular Linear Differential Equations, **10,** 205–224.
Die Herstellung einer lineären Differentialgleichung aus einem gegebenen Element der Integralfunction, **11,** 215–220.

HILDEBRANDT, T. H.

A Contribution to the Foundations of Fréchet's Calcul Fonctionnel, **34,** 237–290.

HILL, G. W.

Researches in the Lunar Theory, **1,** 5–26, (Errata, **1,** iv); **1,** 129–147; **1,** 245–260. (Errata, **1,** iv).
Note on Hansen's General Formulae for Perturbations, **4,** 256–259.
On Certain Possible Abbreviations in the Computation of the Long-Period Inequalities of the Moon's Motion Due to the Direct Action of the Planets, **6,** 115–130.
Secular Perturbations of the Planets, **23,** 317–336.
Deduction of the Power Series Representing a Function from Special Values of the Latter, **27,** 203–216.
Attraction of the Homogeneous Spherical Segment, **29,** 345–362.

HILL, JOHN E.

On Three Septic Surfaces, **19,** 289–311.

HILL, LESTER S.

Properties of Certain Aggregate Functions, **49,** 419–432.

HILTEBEITEL, ADAM MILLER

On the Problem of Two Fixed Centres and Certain of its Generalizations, **33,** 337–362.

HILTON, HAROLD (and R. E. COLOMB)

On Orthoptic and Isoptic Loci, **39,** 86–94.

HOLGATE, THOMAS F.

On Certain Ruled Surfaces of the Fourth Order, **15,** 344–386.

Note Additional to a Former Paper " On Certain Ruled Surfaces of the Fourth Order," **22,** 27–30.

HOLLCROFT, TEMPLE RICE

A Classification of General (2, 3) Point Correspondence between Two Planes, **41,** 5–24.

On (2, 3) Compound Involutions, **43,** 199–212.

Plane Involutions of Order Four, **44,** 163–171.

A Classification of General (2, 3) Point Correspondence between Two Planes, **45,** 5.

Self Dual Space Curves, **48,** 113–124.

On (3, 3) and Higher Point Correspondences, **49,** 553–564.

HOLMAN, M. L. (and ENGLER, E. A.)

The Tangent to the Parabola, **1,** 379–383. (Erratum, **2,** iv).

HOOVER, BORDEN PARKER

Expansions in Terms of Certain Polynomials Connected with the Gamma-Function, **48,** 125–138.

HOWE, ANNA MAYME

The Classification of Plane Involutions of Order (3), **41,** 25–48.

HOWLAND, LEROY A.

Binary Conditions for Double and Triple Points on a Cubic, **36,** 441–448.

HUBER, C. M.

On Complete Systems of Irrational Invariants of Associated Point Sets, **49,** 251–267.

HUDSON, HILDA P.

On Cubic Birational Space-Transformations, **34,** 203–210.

On the Product of Two Quadro-Quadric Space-Transformations, **35,** 183–188.

HULBURT, L. S.

A Class of New Theorems on the Number and Arrangement of the Real Branches of Plane Algebraic Curves, **14,** 246–250.

HUMBERT, GEORGES

Sur l'orientation des systèmes de droites, **10,** 258–281.
Sur les surfaces de Kummer elliptiques, **16,** 221–253.

HUTCHINSON, J. I.

On Linear Transformations which Leave an Hermitian Form Invariant, **32,** 195–206.

HYDE, E. W.

Centre of Gravity of Surface and Solid of Revolution, **3,** 329–331.
Calculus of Direction and Position, **6,** 1–13.

ISSERLIS, L.

On the Ordering of the Terms of Polars and Transvectants of Binary Forms, **45,** 54–71.

JACKSON, DUNHAM

A General Class of Problems in Approximation, **46,** 215–234.

JACKSON, F. H.

Some Properties of a Generalized Hypergeometric Function, **27,** 1–6.
q-Difference Equations, **32,** 305–314.

JACKSON, W. H.

Wallace's Theorem Concerning Plane Polygons of the Same Area, **34,** 383–390.

JAHNKE, E.

Note to Professor Craig's Memoir, "Displacements Depending on One, Two and Three Parameters in a Space of Four Dimensions," **21,** 191–192.

JAMES, G. O.

Some Differential Equations Connected with Hypersurfaces, **25,** 249–260.

JENKINS, MORGAN

Proof of a Theorem in Partitions, **6,** 331–333.
Further List of Corrections Suggested by M. Jenkins to Professor Sylvester's Constructive Theory of Partitions, **6,** 334–336.
Note on Professor Sylvester's "Constructive Theory of Partitions," **7,** 74–81.
On Professor Cayley's Extension of Arbogast's Method of Derivations, **10,** 29–41.

JOHNSON, WILLIAM WOOLSEY

Note on the "15" Puzzle, **2,** 397–399.
The Strophoids, **3,** 320–325.
The Imaginary Period in Elliptic Functions, **6,** 246–252.
Reduction of Alternating Functions to Alternants, **7,** 345–346.
On a Formula of Reduction for Alternants of the Third Order, **7,** 347–352.
On the Calculation of the Co-factors of Alternants of the Fourth Order, **7,** 380–388.
Symbolic Treatment of Exact Linear Differential Equations, **10,** 94–98.
On the Integrals in Series of Binomial Differential Equations, **11,** 37–54.
Some Theorems Relating to Groups of Circles and Spheres, **14,** 97–114.

JOHNSTON, F. E.

Transitive Substitution Groups Containing Regular Subgroups of Lower Degree, **50,** 231–242.

JORDAN, HERBERT E.

Group-Characters of Various Types of Linear Groups, **29,** 387–405.

KANTOR, S.

Theorie der Transformationen im R_r, welche sich aus Quadratischen zusammensetzen lassen, **18,** 219–263.
Theorie der periodischen cubischen Transformationen im Raume R_3, **19,** 1–59.
Ueber Collineationsgruppen an Kummer'schen Flächen, **19,** 86–91. (Berichtigung, **19,** 382.)
Die Typen der linearen Complexe rationaler Curven im R_r, **23,** 1–28.
Die Typen der linearen Complexe elliptischer Curven in R_r, **24,** 205–256.

KASNER, EDWARD

The Double-six Configuration Connected with the Cubic Surface, and a Related Group of Cremona Transformations, **25,** 107–122.
Determination of the Algebraic Curves whose Polar Conics are Parabolas, **26,** 164–168.
The Geometry of Differential Elements of the Second Order with Respect to the Group of all Point Transformations, **28,** 203–213.
The General Transformation Theory of Differential Elements, **32,** 391–401.
The Group of Turns and Slides and the Geometry of Turbines, **33,** 193–202.
Infinite Groups Generated by Conformal Transformations of Period Two (Involutions and Symmetries), **38,** 177–184.
Einstein's Theory of Gravitation: Determination of the Field by Light Signals, **43,** 20–28.
The Impossibility of Einstein Fields Immersed in Flat Space of Five Dimensions, **43,** 126–129.

Finite Representation of the Solar Gravitational Field in Flat Space of Six Dimensions, **43,** 130–133.
Geometrical Theorems on Einstein's Cosmological Equations, **43,** 217–221.

KELLOGG, O. D.

The Oscillation of Functions of an Orthogonal Set, **38,** 1–5.
Orthogonal Function Sets Arising from Integral Equations, **40,** 145–154.
Interpolation Properties of Orthogonal Sets of Solutions of Differential Equations, **40,** 225–234.

KELLS, LYMAN M.

Complete Characterization of Dynamical Trajectories in N-Space, **46,** 258–272.

KEMPE, A. B.

On the Geographical Problem of the Four Colours, **2,** 193–200.

KENDALL, CLARIBEL

Congruences Determined by a Given Surface, **45,** 25–41.

KENDALL, OTIS H.

On a Short Process for Solving the Irreducible Case of Cardan's Method, **1,** 285–287.

KEYSER, C. J.

The Plane Geometry of the Point in Point-Space of Four Dimensions, **25,** 301–330.
Concerning Certain 4-Space Quintic Configurations of Point Ranges and Congruences, and Their Sphere Analogues in Ordinary Space, **27,** 303–314.

KINGSTON, H. R.

Metric Properties of Nets of Plane Curves **38,** 407–430.

KIRCHER, EDWARD

Some Properties of Certain Finite Algebras, **39,** 272–280.

KLUYVER, J. C.

Concerning the Twisted Biquadratic, **19,** 319–328.

KOENIGS, G.

Sur un problème concernant deux courbes gauches, **19,** 259–266.

KOENIGSBERGER, LEO

Ueber die Reduction von Integralen transcendenter Functionen, **11,** 221–282.

KOLOSOFF, G.

On Some Cases of Motion of a Solid in Infinite Liquid, **28,** 367–376.

KRATHWOHL, WILLIAM C.

Modular Invariants of Two Pairs of Cogredient Variables, **36,** 449–460.

KUHN, HARRY WALDO

On Imprimitive Substitution Groups, **26,** 45–102.

KUMMELL, CHARLES H.

To Express the Roots of the Solvable Quantics as Symmetrical Functions of Homologues, **18,** 74–94.

KÜSTERMANN, W. W.

Fourier's Constants of Functions of Several Variables, **39,** 113–122.

LADD, CHRISTINE

The Pascal Hexagram, **2,** 1–12.

On De Morgan's Extension of the Algebraic Processes, **3,** 210–225. (Errata, **3,** v).

On Segments Made on Lines by Curves, **4,** 272.

LAMOND, J. K.

On the Continuity of a Lebesgue Integral with Respect to a Parameter, **36,** 387–391.

LAMSON, K. W.

A General Implicit Function Theorem with an Application to Problems of Relative Minima, **42,** 243–256.

LANDAU, EDMUND

Bemerkungen zu Herrn D. N. Lehmer's Abhandlung in Bd. 22 dieses Journals, S. 293–335, **26,** 209–222.

Lösung des Lehmer'schen Problems, **31,** 86–102. (Correction, **31,** ii).

LANE, A. V.

Note on a Roulette, **8,** 132–137.

LANE, ERNEST P.

Conjugate Systems with Indeterminate Axis Curves, **43,** 52–68.

The Correspondence Between the Tangent Plane of a Surface and its Point of Contact, **48,** 204–214.

Contributions to the Theory of Conjugate Nets, **49,** 565–576.

LANGMAN, HARRY

Conformal Transformations of Period n and Groups Generated by Them, **44,** 54–86.

LARMOR, JOSEPH

Note on Mr. A. B. Basset's Paper, "Theory of the Action of Magnetism on Light, **19,** 371–376.

LASKER, E.

A Geometric Proposition, **26,** 177–179.
A New Method in Geometry, **30,** 65–92.

LATIMER, CLAIBORNE G.

Arithmetics of Generalized Quaternion Algebras, **48,** 57–66.

LEFSCHETZ, SOLOMON

On Some Topological Properties of Plane Curves and a Theorem of Möbius, **35,** 189–200.
Geometry on Ruled Surfaces, **36,** 392–394.
A Theorem on Correspondences on Algebraic Curves, **50,** 159–166.

LEHMER, DERRICK HENRY

On the Value of the Napierian Base, **48,** 139–143.

LEHMER, DERRICK NORMAN

Asymptotic Evaluation of Certain Totient Sums, **22,** 293–335.
The Parametric Representation of the Tetrahedroid Surface, **25,** 1–16.
On the Arithmetical Theory of Pencils of Binary Quadratic Forms, **34,** 21–30.
Arithmetical Theory of Certain Hurwitzian Continued Fractions, **40,** 375–390.

LEHR, MARGUERITE

The Plane Quintic with Five Cusps, **49,** 197–214.

LENNES, N. J.

Concerning the Improper Definite Integral, **29,** 13–22.
Theorems on the Simple Finite Polygon and Polyhedron, **33,** 37–62.
Curves in Non-Metrical Analysis Situs with an Application in the Calculus of Variations, **33,** 287–326.

LEONARD, HEMAN BURR

On the Definition of Reducible Hypercomplex Number Systems II, **27,** 381–405.
On the Factoring of Composite Hypercomplex Number Systems, **30,** 43–64.

LEONARD, HEMAN BURR (and EPSTEEN, SAUL)

On the Definition of Reducible Hypercomplex Number Systems, **27,** 217–242.

LEWIS, FLORENCE P.

A Geometrical Application of the Theory of the Binary Quintic, **36,** 333–356.

LIE, SOPHUS

Die Begriffe Gruppe und Invariante, **11,** 182–186.

LING, G. H., and MILLER, G. A.

Proof that there Is No Simple Group whose Order Lies between 1092 and 2001, **22,** 13–26.

LIOUVILLE, R.

Sur les lignes géodésiques des surfaces à courbure constante, **10,** 283–292.

LIPSCHITZ, R.

Demonstration of a Fundamental Theorem Obtained by Mr. Sylvester, **1,** 336–340.

LITTLE, C. N.

Note on a Geometrical Theorem, **15,** 190.

LITTLE, C. N. (and MOORE, E. H.)

Note on Space-Divisions, **8,** 127–131.

LOGSDON, MAYME I.

Equivalence and Reduction of Pairs of Hermitian Forms, **44,** 247–260.

LOUDON, JAMES

Euler's Equations of Motion, **1,** 387–388.
Condition of a Straight Line Touching a Surface, **1,** 388.
Notes on Relative Motion, **3,** 174–178.

LOVE, A. E. H.

Vortex Motion in Certain Triangles, **11,** 158–171.

LOVE, CLYDE E.

On the Asymptotic Solutions of Linear Differential Equations, **36,** 151–166.
On Linear Difference and Differential Equations, **38,** 57–80.

LOVETT EDGAR ODELL

Point Transformations in Elliptic Coördinates of Circles Having Double Contact with a Conic, **20,** 242–244.

Note on Differential Invariants of a System of m Points by Projective Transformation, **21,** 168–174.
Note on the Differential Invariants of Goursat and Painlevé, **22,** 41–45.
Supplementary Note on Projective Invariants, **22,** 46–48.
Families of Transformations of Straight Lines into Spheres, **22,** 138–145.
A Property of Lines in n-Dimensional Space, **22,** 226–230.
Construction of the Geometry of Euclidean n-Dimensional Space by the Theory of Continuous Groups, **23,** 57–67.
On a Group of Transformations which Occurs in the Problem of Several Bodies, **30,** 307–324.

LOVITT, W. V.

Some Singularities of a Contact Transformation, **39,** 27–40.

LUCAS, EDOUARD

Théorie des fonctions numériques simplement périodiques, **1,** 184–240; 289–321.
Sur l'analyse indéterminée du troisième degré. Démonstration de plusieurs théorèmes de M. Sylvester, **2,** 178–185.

LUNN, ARTHUR C.

The Apparent Size of a Closed Curve, **32,** 186–194.

MACMAHON, P. A.

Seminvariants and Symmetric Functions, **6,** 131–163.
Note on the Development of an Algebraic Fraction, **6,** 287–288.
Symmetric Functions of the 13^{ic}, **6,** 289–300.
On Perpetuants, **7,** 26–46.
A Second Paper on Perpetuants, **7,** 259–263.
Memoir on Seminvariants, **8,** 1–18.
Observations on the Generating Functions of the Theory of Invariants, **9,** 189–192.
Properties of a Complete Table of Symmetric Functions, **10,** 42–46.
The Expression of Syzygies among Perpetuants by Means of Partitions, **10,** 149–168.
Memoir on a New Theory of Symmetric Functions, **11,** 1–36.
Second Memoir on a New Theory of Symmetric Functions, **12,** 61–102.
Third Memoir on a New Theory of Symmetric Functions, **13,** 193–234.
Fourth Memoir on a New Theory of Symmetric Functions, **14,** 15–38.
The Indices of Permutations and the Derivation therefrom of Functions of a Single Variable Associated with the Permutations of any Assemblage of Objects, **35,** 281–322.

MACMILLAN, WILLIAM DUNCAN

The Motion of a Particle Attracted towards a Fixed Center by a Force Varying Inversely as the Fifth Power of the Distance, **30,** 282–306.

On Foucault's Pendulum, **37,** 95–106.

A Theorem Connected with Irrational Numbers, **38,** 387–396.

MACMILLAN, W. D. (and MOULTON, F. R.)

On the Solution of Certain Types of Linear Differential Equations with Periodic Coefficients, **33,** 63–96.

MALLET, J. W.

Some Remarks on a Passage in Professor Sylvester's Paper as to the Atomic Theory, **I,** 277–281.

MANNING, HENRY P.

Reduction of $\frac{dx}{\sqrt{A(1+mx^2)(1+nx^2)}}$ to $\frac{M\,dy}{\sqrt{(1-y^2)(1-k^2y^2)}}$ by the Substitution $x^2 = \frac{a+by^2}{a'+b'y^2}$, **13,** 185–188.

A Note on Linear Transformation, **14,** 95–96.

On the Order of Terms in a Semi-Convergent Series, **16,** 151–155.

MANNING, W. A.

On the Primitive Groups of Class Ten, **28,** 226–236.

On the Primitive Groups of Classes Six and Eight, **32,** 235–256.

The Primitive Groups of Class Twelve, **35,** 229–260.

The Primitive Groups of Class 15, **39,** 281–310.

MARRIOTT, ROSS W.

Determination of the Order of the Groups of Isomorphisms of the Groups of Order p^4, where p Is a Prime, **38,** 139–154.

MARSHALL, WILLIAM

The Asymptotic Representation of the Elliptic Cylinder Functions, **31,** 311–336.

MARTIN, EMILIE NORTON

On the Imprimitive Substitution Groups of Degree Fifteen and the Primitive Substitution Groups of Degree Eighteen, **23,** 259–286.

MASCHKE, H.

On Ternary Substitution-Groups of Finite Order which Leave a Triangle Unchanged, **17,** 168–184.

The Representation of Finite Groups, Especially of the Rotation Groups of the Regular Bodies of Three- and Four-dimensional Space, by Cayley's Color Diagrams, **18,** 156–194.

MASON, THOMAS E.

Character of the Solutions of Certain Functional Equations, **36,** 419–440.
On Properties of the Solutions of Linear q-Difference Equations with Entire Function Coefficients, **37,** 439–444.

MATHEWSON, LOUIS CLARK

Theorems on the Groups of Isomorphisms of Certain Groups, **38,** 19–44.
On the Groups of Isomorphisms of a System of Abelian Groups of Order p^m and Type $(n, 1, 1, \cdots, 1)$, **42,** 119–128.

McATEE, J. E.

Modular Invariants of a Quadratic Form for a Prime Power Modulus, **41,** 225–242.

McCLINTOCK, EMORY

An Essay on the Calculus of Enlargement, **2,** 101–161. (Errata, **2,** iv).
A New General Method of Interpolation, **2,** 307–314.
On a Theorem for Expanding Functions of Functions, **2,** 348–353.
Note on a Theorem for Expanding Functions of Functions, **3,** 173.
On Certain Expansion Theorems, **4,** 16–24.
On the Remainder of Laplace's Series, **4,** 96.
On the Resolution of Equations of the Fifth Degree, **6,** 301–315.
Analysis of Quintic Equations, **8,** 45–84.
On the Algebraic Proof of a Certain Series, **14,** 67–71.
On Independent Definitions of the Functions log (x) and e^x, **14,** 72–86.
On the Computation of Covariants by Transvection, **14,** 222–229.
Theorems in the Calculus of Enlargement, **17,** 69–80.
A Method for Calculating Simultaneously All the Roots of an Equation, **17,** 89–110.
On the Most Perfect Forms of Magic Squares, with Methods for their Production **19,** 99–120.
Further Researches in the Theory of Quintic Equations, **20,** 157–192.

McDONALD, J. H.

The Ovals of the Plane Sextic Curve, **49,** 523–526.

McKELVEY, JOSEPH VANCE

The Groups of Birational Transformations of Algebraic Curves of Genus 5, **34,** 115–146.

McKINNEY, THOMAS E.

Concerning a Certain Type of Continued Fractions Depending on a Variable Parameter, **23,** 213–278.

MERRILL, ARCHIBALD SHEPARD

An Isoperimetric Problem with Variable End-Points, **41,** 60–78.

MERRIMAN, GAYLORD M.

On Certain Theorems Regarding Summable Series and their Application to the Double and Triple Fourier's Series, **47,** 125–139.

MERRIMAN, MANSFIELD

The Deduction of Final Formulas for the Algebraic Solution of the Quartic Equation, **14,** 237–245.

METZLER, GEORGE F.

Surfaces of Rotation with Constant Measure of Curvature and their Representation on the Hyperbolic (Cayley's) Plane, **20,** 76–86.

METZLER, WILLIAM H.

On the Roots of Matrices, **14,** 326–377.

On Certain Properties of Symmetric, Skew Symmetric, and Orthogonal Matrices, **15,** 274–282.

Compound Determinants, **16,** 131–150.

Compound Determinants, **20,** 253–272.

A Theorem in Determinants, **20,** 273–276.

On the Roots of a Determinantal Equation, **21,** 367–368.

On the Excess of the Number of Combinations in a Set which Have an Even Number of Inversions over Those which Have an Odd Number, **22,** 55–59.

MICHAL, ARISTOTLE D.

Affinely Connected Function Space Manifolds, **50,** 473–517.

MILLER, ALTON L.

Systems of Pencils of Lines in Ordinary Space, **40,** 174–186.

MILLER, G. A.

On the Primitive Substitution Groups of Degree Sixteen, **20,** 229–241.

On the Perfect Groups, **20,** 277–282.

Memoir on the Substitution-Groups whose Degree Does not Exceed Eight, **21,** 287–338.

On the Product of Two Substitutions, **22,** 185–190.

On the Transitive Substitution Groups whose Order Is a Power of a Prime Number, **23,** 173–178.

Groups Defined by the Orders of Two Generators and the Order of their Product, **24,** 96–100.

On a Method of Constructing All the Groups of Order p^m, **24,** 395–398.

Determination of All the Characteristic Subgroups of Any Abelian Group, **27,** 15–24.

Some Relations Between Number Theory and Group Theory, **27,** 315–322.

The Groups which Contain less than Fifteen Operators of Order Two, **29,** 1–12.

Groups in which Every Subgroup Is either Abelian or Dihedral, **29,** 289–294.

Groups Generated by n Operators Each of Which Is the Product of the $n-1$ Remaining Ones, **30,** 93–98.

Methods to Determine the Primitive Roots of a Number, **31,** 42–44.

Finite Groups which May Be Defined by Two Operators Satisfying Two Conditions, **31,** 167–182.

Generalizations of the Tetrahedral and Octahedral Groups, **32,** 65–74.

Groups of Transformations of Sylow Subgroups, **32,** 299–304.

Abstract Definitions of All the Substitution Groups whose Degrees do not Exceed Seven, **33,** 363–372.

Groups Containing a Given Number of Operators whose Orders Are Powers of the Same Prime Number, **35,** 1–9.

The Group of Isomorphisms of an Abelian Group and Some of its Abelian Subgroups, **36,** 47–52.

Possible Characteristic Operators of a Group, **39,** 404–406.

Groups Generated by Two Operators whose Relative Transforms Are Equal to Each Other, **41,** 1–4.

Groups of Order $2^{m'}$ which Contain a Relatively Large Number of Operators of Order Two, **42,** 1–10.

Characteristic Subgroups of an Abelian Prime Power Group, **42,** 278–286.

Substitution Groups whose Cycles of the Same Order Contain a Given Number of Letters, **44,** 122–128.

Imprimitive Substitution Groups, **47,** 176–180.

Subgroups of Index p^2 Contained in a Group of Order p^m, **48,** 253–256.

MILLER, G. A. (and LING, G. H.)

Proof that there Is no Simple Group whose Order Lies between 1092 and 2001, **22,** 13–26.

MILLER, JOHN A.

Concerning Certain Elliptic Modular Functions of Square Rank, **27,** 47–68.

MITCHELL, HOWARD H.

Determination of All Primitive Collineation Groups in More than Four Variables which Contain Homologies, **36,** 1–12.

On the Asymptotic Value of Sums of Power Residues **39,** 425–429.

MITCHELL, O. H.

On Binomial Congruences; Comprising an Extension of Fermat's and Wilson's Theorems, and a Theorem of which Both Are Special Cases, **3,** 294–315.

Some Theorems in Numbers, **4,** 25–38.

Note on Determinants of Powers, **4,** 341–344.

MOORE, C. L. E.

Classification of the Surfaces of Singularities of the Quadratic Spherical Complex, **27,** 248–279.

Some Properties of Lines in Space of Four Dimensions and their Interpretation in the Geometry of the Circle in Space of Three Dimensions, **33,** 129–152.

MOORE, ELIAKIM HASTINGS

Algebraic Surfaces of which Every Plane-Section Is Unicursal in the Light of n-Dimensional Geometry, **10,** 17–28.

A Problem Suggested in the Geometry of Nets of Curves and Applied to the Theory of Six Points Having Multiply Perspective Relations, **10,** 243–257.

Tactical Memoranda, I–III, **18,** 264–303.

The Cross-Ratio Group of $n!$ Cremona Transformations of Order $n-3$ in Flat Space of $n-3$ Dimensions, **22,** 279–291.

Concerning Klein's Group of $(n+1)!$ n-ary Collineations, **22,** 336–342.

MOORE, E. H. (and LITTLE, C. N.)

Note on Space-Divisions, **8,** 127–131.

MOORE, E. H. (and SMITH, H. L.)

A General Theory of Limits, **44,** 102–121.

MOORE, L. T.

Determination of the Type of Tricrunodal Quartic by Means of its Invariants, **48,** 241–252.

MOORE, L. T. (and NEELLEY, J. H.)

Rational Tacnodal and Oscnodal Quartic Curves Considered as Plane Sections of Quartic Surfaces, **50,** 467–472.

MOORE, R. L.

On the Lie-Riemann-Helmholtz-Hilbert Problem of the Foundations of Geometry **41,** 299-319.

Conditions under which One of Two Given Closed Linear Point Sets May be Thrown into the Other One by a Continuous Transformation of a Plane into Itself, **48,** 67–72.

MOORE, T. W.

On the Invariant Combinants of Two Binary Quintics, **50,** 415–430.

MORDELL, L. J.

On the Number of Solutions in Positive Integers of the Equation $yz + zx + xy = n$, **45,** 1–4.

MORGAN, FRANK M.

Involutorial Transformations, **35,** 79–104.

MORITZ, ROBERT E.

Generalization of the Differentiation Process, **24,** 257–302.

MORLEY, FRANK

On Critic Centres, **10,** 141–148.
Note on Geometric Inferences from Algebraic Symmetry, **10,** 173–174.
On the Geometry of a Nodal Circular Cubic, **11,** 307–316.
On the Epicycloid, **13,** 179–184.
On Adjustable Cycloidal and Trochoidal Curves, **16,** 188–204.
On the Lüroth Quartic Curve, **41,** 279–282.
Note on Einstein's Equation of an Orbit, **43,** 29–32.
The Curve of Ambience, **46,** 193–200.
The Eliminant of a Net of Curves, **47,** 91–97.
On an Equation of Planar Motion, **47,** 98–100.
On Differential Inversive Geometry, **48,** 144–146.

MORLEY, F. (and COBLE, A. B.)

New Results in Elimination, **49,** 463–488.

MORLEY, F. (and CONNER, J. R.)

Plane Sections of a Weddle Surface, **31,** 263–270. (Correction, **31,** ii).

MORLEY, RAYMOND K.

On the Fundamental Postulate of Tamisage, **34,** 47–68.

MORRISON, BESSIE GROWE

Removal of any Two Terms from a Binary Quantic by Linear Transformations, **23,** 287–296.

MORRISON, F. M.

On the Relation between Some Important Notions of Projective and Metrical Differential Geometry, **39,** 199–220.

MORSE, DAVID SHERMAN

Relative Inclusiveness of Certain Definitions of Summability, **45,** 259–285.

MORSE, HAROLD MARSTON

A One-to-One Representation of Geodesics on a Surface of Negative Curvature, **43,** 33–51.

MOULTON, F. R.

On Certain Expansions of Elliptic, Hyperelliptic and Related Periodic Functions, **34,** 177–202.

MOULTON, F. R. (and MACMILLAN, W. D.)

On the Solution of Certain Types of Linear Differential Equations with Periodic Coefficients, **33,** 63–96.

MUIR, THOMAS

Letter to Mr. Sylvester on the word Continuant, **1,** 344.

On the Multiplication of the $(n-1)$-th Power of a Symmetric Determinant of the n-th Order by the Second Power of any Determinant of the Same Order, **4,** 273–275.

On Sylvester's Proof of the Reality of the Roots of Lagrange's Determinantal Equation, **19,** 312–318.

A Reinvestigation of the Problem of the Automorphic Linear Transformation of a Bipartite Quadric, **20,** 215–228.

MURNAGHAN, FRANCIS D.

The Lines of Electric Force Due to a Moving Electron, **39,** 147–162.

MURRAY, F. H.

The Asymptotic Expansion of the Functions $W_{k,m}(Z)$ of Whittaker, **45,** 186–191.

Generalization of Certain Theorems of Bohl, **47,** 25–44.

Generalization of Certain Theorems of Bohl [Second Paper], **49,** 67–86.

MUSSELMAN, JOHN ROGERS

The Set of Eight Self-Associated Points in Space, **40,** 69–86.

On an Imprimitive Group of Order 5184, **49,** 355–366.

NANSON, E. J.

Minors of Axi-symmetric Determinants, **27,** 69–76.

NEELLEY, J. H.

Compound Singularities of the Rational Plane Quartic Curve, **49,** 389–400.

NEELLEY, J. H. (and MOORE, L. T.)

Rational Tacnodal and Oscnodal Quartic Curves Considered as Plane Sections of Quartic Surfaces, **50,** 467–472.

NELSON, A. L.

Note on Seminvariants of Systems of Partial Differential Equations, **41,** 123–132.

NELSON, CYRIL A.

The Riemann Adjoints of Completely Integrable Systems of Partial Differential Equations, **46,** 117–130.

NEWCOMB, SIMON

Note on a Class of Transformations which Surfaces May Undergo in Space of More than Three Dimensions, **1,** 1–4.

A Method of Developing the Perturbative Function of Planetary Motion, **3,** 193–209.

Note on the Frequency of Use of the Different Digits in Natural Numbers, **4,** 39–40.

A Generalized Theory of the Combination of Observations so as to Obtain the Best Result, **8,** 343–366.

NEWSON, H. B.

A Pair of Curves of the Fourth Degree and their Application in the Theory of Quadrics, **14,** 87–94.

A New Theory of Collineations and their Lie Groups, **24,** 109–172.

NIXON, H. B. (and FIELDS, J. C.)

Bibliography of Linear Differential Equations, **7,** 353–363.

NYBERG, JOSEPH A.

Projective Differential Geometry of Rational Cubic Curves, **35,** 453–464.

NYSWANDER, J. A.

A Direct Solution of Systems of Linear Differential Equations Having Constant Coefficients, **47,** 257–276.

D'OCAGNE, MAURICE

Sur une classe de nombres remarquables, **9,** 353–380.

Sur certaines courbes qu'on peut adjoindre aux courbes planes pour l'étude de leurs propriétés infinitésimales, **11,** 55–70.

Quelques propriétés des nombres K_m^p, **13,** 145–152.

Extrait d'une lettre de M. d'Ocagne à M. Craig, **14,** 389.

OSBORN, JESSE O.

A Study of the Rational Involutorial Transformations in Space which Leave a Web of Sextic Surfaces Invariant, **46,** 17–36.

OSGOOD, WILLIAM F.

The Symbolic Notation of Aronhold and Clebsch, **14,** 251–261.
The System of Two Simultaneous Ternary Quadratic Forms, **14,** 262–273.
Non-uniform Convergence and the Integration of Series Term by Term, **19,** 155–190.

OWENS, HELEN BREWSTER

Conjugate Line Congruences of the Third Order Defined by a Family of Quadrics, **35,** 323–356.

PAGE, JAMES M.

On the Primitive Groups of Transformations in Space of Four Dimensions, **10,** 293–346.
Note on Singular Solutions, **18,** 95–97.

PATTERSON, BOYD C.

The Differential Invariants of Inversive Geometry, **50,** 553–568.

PEANO, G.

Sur la définition de la limite d'une fonction. Exercice de logique mathématique, **17,** 37–68.

PEARSON, KARL

Ether Squirts, **13,** 309–362.

PEIRCE, BENJAMIN

Linear Associative Algebra; with Notes and Addenda, by C. S. Peirce, Son of the Author, **4,** 97–229. (Errata, **4,** iv).

PEIRCE, B. O.

On a Certain Class of Equipotential Surfaces, **18,** 130–134.

PEIRCE, CHARLES S.

Esposizione del metodo dei minimi quadrati. Per Annibale Ferrero, **1,** 59–63.
On the Ghosts in Rutherfurd's Diffraction-spectra, **2,** 330–347.
A Quincuncial Projection of the Sphere, **2,** 394–396. (Correction, **3,** v).
On the Algebra of Logic, **3,** 15–57.
On the Logic of Number, **4,** 85–95.
On the Algebra of Logic, **7,** 180–202.

PELL, A.

On the Focal Surfaces of the Congruences of Tangents to a given Surface, **20,** 101–134.

PERKINS, FRED W.

An Intrinsic Treatment of Poisson's Integral, **50,** 389–414.

PEROTT, JOSEPH

Remarque au sujet du théorème d'Euclide sur l'infinité du nombre des nombres premiers, **11,** 99–138; **13,** 235–308.

PETERSEN, JULIUS

A New Proof of the Theorem of Reciprocity, **2,** 285–286.

PETROVITCH, MICHEL

Remarques sur les équations de dynamique et sur le mouvement tautochrone, **18,** 135–144.

Sur l'intégration hydraulique des équations différentielles, **20,** 293–300.

Appariel à liquide pour l'intégration graphique de certains types d'équations différentielles, **22,** 1–12.

PFEIFFER, G. A.

On the Conformal Geometry of Analytic Arcs, **37,** 395–430.

PHILLIPS, A. W.

Link-work for the Lemniscate (Extract from a letter to Mr. Sylvester), **1,** 386.

PHILLIPS, HENRY BAYARD

Some Invariants and Covariants of Ternary Collineations, **36,** 307–332.

Directed Integration, **40,** 235–241.

Functions of Matrices, **41,** 266–278.

PICARD, ÉMILE

Sur les méthodes d'approximations successives dans la théorie des équations différentielles, **20,** 87–100.

Sur l'inversion des intégrales de fonctions à multiplicateurs, **16,** 111–122.

Sur les méthodes d'approximations successives dans la théorie des équations différentielles, **20,** 87–100.

PIERPONT, JAMES

Note on C. S. Peirce's Paper on "A Quincuncial Projection of the Sphere," **18,** 145–152.

On the Invariance of the Factors of Composition of a Substitution-group, **18,** 153–155.

Classification of Quadrics in Hyperbolic Space, **49,** 143–151.

Optics in Space of Constant Non-Vanishing Curvature, **49,** 343–354.

PITCHER, ARTHUR D.

On the Connection of an Abstract Set, with Applications to the Theory of Functions of a General Variable, **36,** 261–266.

POINCARÉ, H.

Sur les équations linéaires aux différentielles ordinaires et aux différences finies, **7,** 203–258. (Errata, **7,** iv).
Sur les fonctions abéliennes, **8,** 289–342.
Sur les équations aux dérivées partielles de la physique mathématique, **12,** 211–294.
Sur les fonctions à espaces lacunaires, **14,** 201–221.

DE POLIGNAC, C.

On Elements Connected Each to Each by One or the Other of Two Reciprocal Relations, **26,** 361–414.

POMPEIU, D.

Sur un exemple de fonction analytique partout continue, **32,** 327–332.

POOR, VINCENT C.

On the Theorems of Gauss and Green, **44,** 20–24.

DEPORTE, JOSEPH VITAL

Irrational Involutions on Algebraic Curves, **40,** 47–68.

PORTER, M. B.

On the Roots of the Hypergeometric and Bessel's Functions, **20,** 193–214.

POST, EMIL L.

Introduction to a General Theory of Elementary Propositions, **43,** 163–185.

PRICE, HENRY F.

Fundamental Regions for Certain Finite Groups in S_4, **40,** 108–112.

PUTNAM, T. M.

Distribution of the Quaternary Linear Homogeneous Substitutions in a Galois Field into Complete Sets of Conjugate Substitutions, **23,** 41–48.
On the Quaternary Linear Homogeneous Group and the Ternary Linear Fractional Group, **24,** 319–366.

RAGSDALE, V.

On the Arrangement of the Real Branches of Plane Algebraic Curves, **28,** 377–404.

RAINICH, G. Y.

Twodimensional Tensor Analysis Without Coördinates, **46,** 71–94.
Second Paper on Tensor Analysis, **47,** 11–24.
Third Paper on Tensor Analysis, **47,** 225–248.

RANUM, ARTHUR

The Group-Membership of Singular Matrices, **31,** 18–41.
On the Principle of Duality in the Geometry of the Sphere, **34,** 31–46.
On the Projective Differential Classification of N-Dimensional Spreads Generated by ∞^1 Flats, **37,** 117–158.
The Groups Belonging to a Linear Associative Algebra, **49,** 285–308.

RAWLINS, CHARLES HENRY, JR.

Complete Systems of Concomitants of the Three-Point and the Four-Point in Elementary Geometry, **40,** 155–173.

REDDICK, HARRY WILFRED

Systems of Tautochrones in a General Field of Force, **32,** 365–390.

REDFIELD, J. HOWARD

The Theory of Group-Reduced Distributions, **49,** 433–455.

REED, F. W.

On Integral Invariants, **40,** 97–107.

REID, LEGH W.

A Table of Class Numbers for Cubic Number Fields, **23,** 68–84.

REINSCH, BERNHARD PAUL

Expansion Problems in Connection with the Hypergeometric Differential Equation, **47,** 45–70.

RETTGER, E. W.

On Lie's Theory of Continuous Groups, **22,** 60–95.

RICE, C. D.

Invariants of Differential Geometry by the Use of Vector Forms, **41,** 165–182.

RICE, LEPINE HALL

P-way Determinants, with an Application to Transvectants, **40,** 242–262.
Some Determinant Expansions, **42,** 237–242.

RICHARDSON, R. G. D.

Contributions to the Study of Oscillation Properties of the Solutions of Linear Differential Equations of the Second Order, **40,** 283–316.

RICHMOND, D. E.

Number Relations between Types of Extremals Joining a Pair of Points, **50,** 371–388.

RIDER, PAUL R.

The Space Problem of the Calculus of Variations in Terms of Angle, **39,** 241–256.

RIETZ, HENRY LEWIS

On Primitive Groups of Odd Order, **26,** 1–30.

RITT, J. F.

On Certain Points in the Theory of Dirichlet Series, **50,** 73–86.

ROBBINS, RAINARD B.

A Method in the Calculus of Variations, **37,** 367–394.

ROBERTS, R. A.

On Certain Properties of the Plane Cubic Curve in Relation to the Circular Points at Infinity, **23,** 85–98; **24,** 61–86.

ROBERTS, SAMUEL

On an Immediate Generalization of Local Theorems in which the Generating Point divides a variable Linear Segment in a Constant Ratio, **3,** 336–343.

ROBINSON, L. B.

A New Canonical Form for Systems of Partial Differential Equations, **39,** 95–112.

A Poristic System of Equations, **45,** 145–153.

ROE, E. D., JR.

Note on Symmetric Functions, **25,** 97–106.

ROOS, C. F.

A Mathematical Theory of Competition, **47,** 163–175.

A Mathematical Theory of Depreciation and Replacement, **50,** 147–157.

ROOT, RALPH E.

Iterated Limits in General Analysis, **36,** 79–104; **36,** 105–133.

ROSS, F. E.

On Differential Equations Belonging to a Ternary Linearoid Group, **25,** 179–205.

ROWLAND, HENRY A.

Note on the Theory of Electric Adsorption, **1,** 53–58. (Erratum, **1,** iv).
Preliminary Notes on Mr. Hall's Recent Discovery, **2,** 354–356.
On the General Equations of Electro-Magnetic Action, with Application to a New Theory of Magnetic Attractions, and to the Theory of the Magnetic Rotation of the Plane of Polarization of Light, **3,** 89–113. (Errata, **3,** v).
On the Motion of a Perfect Incompressible Fluid when No Solid Bodies Are Present, **3,** 226–268. (Errata, **3,** vi).
On the Propagation of an Arbitrary Electro-Magnetic Disturbance, on Spherical Waves of Light and the Dynamical Theory of Diffraction, **6,** 359–381. (Errata, **6,** iv).
Electromagnetic Waves and Oscillations at the Surface of Conductors, **11,** 373–387.

RUSSELL, BERTRAND

The Theory of Implication, **28,** 159–202.
Mathematical Logic as Based on the Theory of Types, **30,** 222–262.

SAFFORD, F. H.

Systems of Revolution and their Relation to Conical Systems, in the Theory of Lamé's Products, **21,** 1–23.

DE SAUSSURE, RENÉ

Note sur les lignes cycloïdales, **17,** 269–272.
Etude de géométrie cinématique réglée, **18,** 304–346.
Calcul géometrique réglé, **19,** 329–370.

SCHOUTE, P. H.

On the Angles of the Regular Polytopes of Four-Dimensional Space, **31,** 303–310.
On the Four-Dimensional Angles of the Semiregular Polytopes of S_4, **35,** 357–368.

SCHOUTEN, J. A. (and STRUIK, D. J.)

On Some Properties of General Manifolds Relating to Einstein's Theory of Gravitation, **43,** 213–216.

SCHWEITZER, ARTHUR RICHARD

A Theory of Geometrical Relations, **31,** 365–410; **35,** 37–56.
Concerning Linear Projective Order, **34,** 169–176.

SCOTT, CHARLOTTE ANGAS

The Binomial Equation $x^p - 1 = 0$, **8,** 261–264.
On the Higher Singularities of Plane Curves, **14,** 301–325.

The Nature and Effect of Singularities of Plane Algebraic Curves, **15,** 221–243.

SEELHOFF, P.

Prüfung grösserer Zahlen auf ihre Eigenschaft als Primzahlen, **7,** 264–269; **8,** 26–38.

Nova methodus numeros compositos a primis dignoscendi illorumque factores inveniendi, **8,** 39–44.

SENSENIG, WAYNE

Concerning the Invariant Theory of Involutions of Conics, **41,** 111–122.

SHARPE, FRANCIS R.

The General Circulation of the Atmosphere, **32,** 52–64.

Finite Groups of Plane Birational Transformations with Eight Fundamental Points, **37,** 55–64.

Conics through Inflections of Self-projective Quartics, **37,** 65–72.

The Problem of Plane Involutions of Order $t > 2$, **50,** 627–635.

SHAUB, HOWARD CONWAY

Rational Involutorial Transformations in S_4 which Leave Invariant ∞^4 Quadric Varieties, **49,** 367–382.

SHAW, JAMES BYRNIE

Development of the A-Process in Quaternions, with a Geometrical Application, **19,** 193–216.

The Linear Vector Operator of Quaternions, **19,** 267–282.

Standard Forms of Certain Types of Peirce Algebras, **31,** 45–61.

On Differential Invariants, **35,** 395–406.

SHEFFER, I. M.

On Entire Function Interpolation, **49,** 329–342.

SHELDON, E. W.

Critical Revision of de Haan's Tables of Definite Integrals, **34,** 89–114.

SHENTON, WALTER FRANCIS

Linear Combinants of Systems of Binary Forms, with the Syzygies of the Second Degree Connecting Them, **37,** 247–271.

SHOOK, C. A.

The Distribution of Lift over Thin Wing Sections, **48,** 183–203.

SICELOFF, L. P.

Simple Groups from Order 2001 to Order 3640, **34,** 361–372.

SIMON, WEBSTER G.

On the Solution of Certain Types of Linear Differential Equations in Infinitely Many Variables, **42,** 27–46.

SISAM, CHARLES H.

On the Determination of the Properties of the Nodal Curve of a Unicursal Ruled Surface, **28,** 43–46.

On Septic Scrolls Having a Rectilinear Directrix, **29,** 48–100.

Concerning Systems of Conics Lying on Cubic Quartic and Quintic Surfaces, **30,** 99–116.

On Some Loci Associated with Plane Curves, **31,** 253–262.

On Three-Spreads Satisfying Four or More Homogeneous Linear Partial Differential Equations of the Second Order, **33,** 97–128.

On Rational Sextic Surfaces Having a Nodal Curve of Order 9, **37,** 445–456.

On Sextic Surfaces Having a Nodal Curve of Order 8, **38,** 373–386.

On Surfaces Containing a System of Cubics that Do not Constitute a Pencil, **41,** 43–59.

On Surfaces Containing Two Pencils of Cubic Curves, **41,** 212–224.

SKINNER, ERNEST BROWN

On Ternary Monomial Substitution-Groups of Finite Order with Determinant ± 1, **25,** 17–58.

SLAUGHT, HERBERT ELLSWORTH

The Cross-Ratio Group of 120 Quadratic Cremona Transformations of the Plane—Part First: Geometric Representation, **22,** 343–380.

The Cross-Ratio Group of 120 Quadratic Cremona Transformations of the Plane—Part Second: Complete Form-System of Invariants, **23,** 99–138.

SLOCUM, S. E.

Relation between Real and Complex Groups with Respect to their Structure and Continuity, **27,** 7–14.

SMITH, CHARLES H.

A Graphic Method of Solving Spherical Triangles, **6,** 175–176.

SMITH, GUY WATSON

Nilpotent Algebras Generated by Two Units, i and j, Such That i^2 Is Not an Independent Unit, **41,** 143–164.

SMITH, H. L. (and MOORE, E. H.)

A General Theory of Limits, **44,** 102–121.

SNYDER, VIRGIL

Lines of Curvature on Annular Surfaces having Two Spherical Directrices, **22,** 96–100.

On some Invariant Scrolls in Collineations which Leave a Group of Five Points Invariant, **22,** 253–258.

On a Special Form of Annular Surfaces, **23,** 166–172.

On the Forms of Unicursal Sextic Scrolls, **25,** 59–84.

On the Forms of Sextic Scrolls of Genus One, **25,** 85–96.

On the Forms of Sextic Scrolls of Genus Greater than One, **25,** 261–268.

On the Forms of Sextic Scrolls having a Rectilinear Directrix, **27,** 77–102.

On the Forms of Sextic Scrolls Having no Rectilinear Directrix, **27,** 173–188.

On Certain Unicursal Twisted Curves, **28,** 237–242.

Twisted Curves whose Tangents Belong to a Linear Complex, **29,** 279–288.

Plane Quintic Curves which Possess a Group of Linear Transformations, **30,** 1–9.

On Birational Transformations of Curves of High Genus, **30,** 10–18.

Normal Curves of Genus 6, and their Groups of Birational Transformations, **30,** 325–336.

On the Range of Birational Transformation of Curves of Genus Greater than the Canonical Form, **30,** 337–346.

Surfaces and Congruences Derived from the Cubic Variety Having a Double Line in Four-Dimensional Space, **31,** 147–166.

Surfaces Invariant under Infinite Discontinuous Birational Groups Defined by Line Congruences, **32,** 177–185.

The Involutorial Birational Transformation of the Plane, of Order 17, **33,** 327–336.

Further Types of Involutorial Transformations which Leave Each Cubic Surface of a Web Invariant, **46,** 131–141.

SOURVOROFF, T. (and WASSILIEFF, A.)

Announcement by the Physico-Mathematical Society of the University of Kasan, **15,** 285–286.

SOUSLEY, C. P.

Invariants and Covariants of the Cremona Cubic Surface, **39,** 135–146.

SPARROW, C. M.

On the Fermat and Hessian Points for the Non-Euclidean Triangle and their Analogues for the Tetrahedron, **43,** 222–225.

SPERRY, PAULINE

Properties of a Certain Projectively Defined Two-Parameter Family of Curves on a General Surface, **40,** 213–224.

STARKWEATHER, G. P.

Non-Quaternion Number-Systems Containing No Skew Units, **21,** 369–386.
A Class of Number-Systems in Six Units, **23,** 378–402.

STAUDE, OTTO

Ueber den Sinn der Windung in den singulären Puncten einer Raumcurve, **17,** 359–380.

STECKER, HENRY FREEMAN

Non-Euclidian Properties of Plane Cubics, **22,** 31–40.
Non-Euclidean Properties of Plane Cubics and of their First and Second Polars, **24,** 399–408.

STEIĆ, GEORGE

Note on the Theory of Optical Images, **38,** 97–108.

STEIMLEY, L. L.

On the Solutions of Linear Non-homogeneous Partial Differential Equations, **37,** 359–366.

STEINMETZ, CHARLES PROTEUS

On the Curves which Are Self-reciprocal in a Linear Nulsystem, and their Configurations in Space, **14,** 161–186.
Multivalent and Univalent Involutory Correspondences in a Plane Determined by a Net of Curves of n^{th} Order, **14,** 39–66.

STEPHENS, R. P.

On the Pentastroid, **30,** 381–393.

STEVENSON, GUY

Expansions of the Neumann Type in Terms of Products of Bessel Functions, **50,** 569–590.

STONE, M. H.

The Borel Summability of Fourier Series, **48,** 101–112.
A Characteristic Property of Certain Sets of Trigonometric Functions, **49,** 535–542.
The Normal Probability Function and General Frequency Functions, **49,** 543–552.

STONE, ORMOND

On the Dynamics of a "Curved Ball," **2,** 211–213.
On the Ratio between Sector and Triangle in the Orbit of a Celestial Body, **3,** 326–328.

STORY, WILLIAM E.

On the Elastic Potential of Crystals, **1,** 177–183. (Errata, **1,** iv).
Note on Mr. Kempe's Paper on the Geographical Problem of the Four Colors, **2,** 201–204.
Note on the "15" Puzzle, **2,** 399–404.
On the Theory of Rational Derivation on a Cubic Curve, **3,** 356–387.
On the Non-Euclidean Trigonometry, **4,** 332–335.
On the Non-Euclidean Geometry, **5,** 180–211.
On Non-Euclidean Properties of Conics, **5,** 358–381. (Errata, **5,** vi).
On the Absolute Classification of Quadratic Loci, and on their Intersections with Each Other and with Linear Loci, **6,** 222–245.
The Addition-Theorem for Elliptic Functions, **7,** 364–375.
A New Method in Analytic Geometry, **9,** 38–44.

STRINGHAM, WASHINGTON IRVING

Some General Formulae for Integrals of Irrational Functions, **2,** 188–190.
The Quaternion Formulae for Quantification of Curves, Surfaces and Solids, and for Barycentres, **2,** 205–210.
Regular Figures in n-Dimensional Space, **3,** 1–14. (Errata, **3,** v).
Determination of the Finite Quaternion Groups, **4,** 345–357.
A Classification of Logarithmic Systems, **14,** 187–194.

STRUIK, D. J. (and SCHOUTEN, J. A.)

On Some Properties of General Manifolds Relating to Einstein's Theory of Gravitation, **43,** 213–216.

STUDY, E.

On the Addition Theorems of Jacobi and Weierstrass, **16,** 156–163.
On Irrational Covariants of Certain Binary Forms, **17,** 185–215.
On the Connection between Binary Quartics and Elliptic Functions, **17,** 216–234.
Beiträge zur Nicht-Euklidischen Geometrie, I, II, III, **29,** 101–167.
Minimalcurven als Örter von Krümmungsmittelpunkten, **32,** 257–263.
Minimalcurven und Serret'sche Flächen, **32,** 264–278.

STUYVAERT, M.

Élimination d'une inconnue entre plusieurs équations algébriques, **37,** 272–280.

SUTTON, FLORA D.

On Certain Chains of Theorems in Reflexive Geometry, **45,** 122–144.

SWIFT, ELIJAH

Canonical Forms for Ordinary Homogeneous Linear Differential Equations of the Second Order with Periodic Coefficients, **50,** 591–612.

SYLVESTER, J. J.

On an Application of the New Atomic Theory to the Graphical Representation of the Invariants and Covariants of Binary Quantics; with Three Appendices, **1,** 64–124. (Errata, **1,** iv; 125).

Note on the Ladenburg Carbon-graph, **1,** 125.

Note on the Theorem Contained in Professor Lipschitz's Paper, **1,** 341–343.

A Synoptical Table of the Irreducible Invariants and Covariants to a Binary Quintic, with a Scholium on a Theorem in Conditional Hyperdeterminants, **1,** 370–378.

Remark on the Preceding Paper (of A. Cayley), **2,** 84.

Note on Determinants and Duadic Disynthemes, **2,** 89–96; **2,** 214–222.

On the Complete System of the "Grundformen" of the Binary Quantic of the Ninth Order, **2,** 98–99.

On Certain Ternary Cubic-Form Equations, **2,** 280–285, (Errata, **2,** iv); **2,** 357–393; **3,** 58–88, **3,** 179–189. (Erratum, **3,** v).

Remarks on the Tables of the Generating Functions and Groundforms for Simultaneous Binary Quantics of the First Four Orders, etc., **2,** 324–329.

On a Point in the Theory of Vulgar Fractions, **3,** 332–335.

Postscript to a Note on a Point in Vulgar Fractions, **3,** 388–389.

Instantaneous Proof of a Theorem of Lagrange on the Divisors of the Form $Ax^2 + By^2 + Cz^2$, with a Postscript on the Divisors of the Functions which Multisect the Primitive Roots of Unity, **3,** 390–392.

Tables of the Generating Functions and Groundforms of the Binary Duodecimic, with Some General Remarks and Tables of the Irreducible Syzygies of Certain Quantics, **4,** 41–61. (Erratum, **4,** iv).

A Demonstration of the Impossibility of the Binary Octavic Possessing Any Groundform of Deg-order 10.4, **4,** 62–84.

On Tchebycheff's Theory of the Totality of the Prime Numbers Comprised within Given Limits, **4,** 230–247. (Erratum, **4,** iv).

On the Solution of a Certain Class of Difference or Differential Equations, **4,** 260–265.

Note on the Theory of Simultaneous Linear Differential or Difference Equations with Constant Coefficients, **4,** 321–326.

Note on Mechanical Involution, **4,** 336–340.

On Subinvariants, *i. e.* Semi-Invariants to Binary Quantics of an Unlimited Order, **5,** 79–136.

Tables of Generating Functions, Reduced and Representative for Certain Ternary Systems of Binary Forms, **5,** 241–250.

Lectures on the Principles of Universal Algebra, **6,** 270-286.

Lectures on the Theory of Reciprocants, **8,** 196–260; **9,** 1–37; **9,** 113–161; **9,** 297–352; **10,** 1–16.

SYLVESTER, J. J. (and F. FRANKLIN)

Tables of the Generating Functions and Groundforms for the Binary Quantics of the First Ten Orders, **2,** 223–251.

Tables of the Generating Functions and Groundforms for Simultaneous Binary Quantics of the First Four Orders, Taken Two and Two together, **2,** 293–306.

A Constructive Theory of Partitions, **5,** 251–330. (Errata, **5,** v-vi).

TABER, HENRY

On the Theory of Matrices, **12,** 337–396.

On Certain Identities in the Theory of Matrices, **13,** 159-172.

On Orthogonal Substitutions that Can be Expressed as a Function of a Single Alternate (or Skew Symmetric) Linear Substitution, **16,** 123–130.

Conditions for the Complete Reducibility of Groups of Linear Substitutions, **38,** 337–372.

TALIAFERRO, THOMAS HARDY

Note on Lines of Curvature, **17,** 273–280.

TAPPAN, ANNA HELEN

Plane Sextic Curves Invariant under Birational Transformations, **37,** 309–336.

THOMAS TRACY YERKES

A Theorem Concerning the Affine Connection, **50,** 518–520.

THOMPSON, HENRY DALLAS

A Note on Pencils of Conics, **9,** 185–188.

Hyperelliptische Schnittsysteme und Zusammenordnung der algebraischen und transcendentalen Thetacharacteristiken, **15,** 91–123.

Simple Pairs of Parallel W-Surfaces, **24,** 303–310.

The Identical Relations between the Elements of any Oblique Triple System of Surfaces, **35,** 427–430.

THOMSEN, H. IVAH

The Osculants of Plane Rational Quartic Curves, **32,** 207–234.

Some Invariants of the Ternary Quartic, **38,** 249–258.

TORREY, MARIAN M.

Classification of Monoidal Involutions Having a Fixed Tangent Cone, **47,** 181–206.

TRACEY, J. I.

Covariant Curves of the Plane Rational Quintic, **36,** 31–46.

TURAZZA, DOMINECO

Di un nuovo teorema relativo alla rotazione di un corpo ad un asse, **5,** 382–384.

TURNER, B. M.

Plane Cubics with a Given Quadrangle of Inflexions, **44,** 261–278.

A Configuration of Thirteen Pencils of Cubics and Cubics with Three Real Inflexions, **47,** 149–162.

USPENSKY, J. V.

On Gierster's Classnumber Relations, **50,** 93–122.

VAN BENSCHOTEN, ANNA L.

The Birational Transformations of Algebraic Curves of Genus Four, **31,** 213–252.

VAN DER VRIES, JOHN N.

On Steinerians of Quartic Surfaces, **32,** 279–288.

VANDIVER, H. S.

On the Power Characters of Units in a Cyclotomic Field, **47,** 140–147.

VAN VELZER, C. A.

Compound Determinants, **6,** 164–172.

VAN VLECK, EDWARD B.

Zur Kettenbruchentwickelung hyperelliptischer und ähnlicher Integrale, **16,** 1–91.

On the Roots of Bessel- and *P*-Functions, **19,** 75–85.

On Certain Differential Equations of the Second Order Allied to Hermite's Equation, **21,** 126–167.

VEBLEN, OSWALD

On the Definition of Multiplication of Irrational Numbers, **34,** 211–214.

VEBLEN, OSWAND (and YOUNG, JOHN WESLEY)

A Set of Assumptions for Projective Geometry, **30,** 347–380.

VENEZIANI, C.

Extrait d'une lettre de M. Hermite. Note to same, **7,** 168–169.

WAHLIN, G. E.

The Factorization of the Rational Primes in a Cubic Domain, **44,** 191–203.

WALSH, J. L.

On the Solution of Linear Equations in Infinitely Many Variables by Successive Approximations, **42,** 91–96.

A Closed Set of Normal Orthogonal Functions, **45,** 5–24.

WARREN, L. A. H.

A Class of Asymptotic Orbits in the Problem of Three Bodies, **38,** 221–248.

WASSILIEFF, A. (and SOURVOROFF, T.)

Announcement by the Physico-Mathematical Society of the University of Kasan, **15,** 285–286.

WEAR, L. E.

Self-Dual Plane Curves of the Fourth Order, **42,** 97–118.

WEATHERBURN, C. E.

On Isometric Systems of Curves and Surfaces, **49,** 527-534.

WEDDERBURN, J. H. M.

On Long Waves, **36,** 211–230.

WEICHOLD, GUIDO

Solution of the Irreducible Case, **1,** 32–49. (Errata, **1,** iv).

Historical Data Concerning the Discovery of the Law of Valence, **1,** 282.

WEISNER, LOUIS

On the Sylow Subgroups of the Symmetric and Alternating Groups, **47,** 121–124.

WELLS, MARY EVELYN

On Inequalities of Certain Types in General Linear Integral Equation Theory, **39,** 163–184.

WESTLUND, JACOB

On a Class of Equations of Transformation, **21,** 339–353.

WHEELER, ANNA PELL

Linear Ordinary Self-Adjoint Differential Equations of the Second Order, **49,** 309–320.

WHELAN, ANNA MARIE

The Theory of the Binary Octavic, **48,** 73–100.

WHITCOM, A. W.

On the Expansion of $\phi(x+h)$, **3,** 344–355. (Errata, **3,** vi).

WHITE, HENRY S.

On Generating Systems of Ternary and Quaternary Linear Transformations, **14,** 274–282.

A Symbolic Demonstration of Hilbert's Method for Deriving Invariants and Covariants of Given Ternary Forms, **14,** 283–290.

Semi-Combinants as Concomitants of Affiliants, **17,** 235–265.

Cubic Involutions and a C_3, **48,** 223–224.

WHITEHEAD, A. N.

Memoir on the Algebra of Symbolic Logic, Part I, **23,** 139–165.

Memoir on the Algebra of Symbolic Logic, Part II, **23,** 297–316.

On Cardinal Numbers, **24,** 367–394.

The Logic of Relations, Logical Substitution Groups, and Cardinal Numbers, **25,** 157–178.

Theorems on Cardinal Numbers, **26,** 31–32.

WHITTEMORE, JAMES K.

Associate Minimal Surfaces, **40,** 87–96.

Reciprocity in a Problem of Relative Maxima and Minima, **43,** 271–290.

WHYBURN, G. T.

Concerning the Structure of a Continuous Curve, **50,** 167–194. (Corrections, **50,** 636.)

WIDDER, D. V.

On the Interpolatory Properties of a Linear Combination of Continuous Functions, **49,** 221–234.

Note on Tschebycheff Approximation, **49,** 235–240.

The Singularities of a Function Defined by a Dirichlet Series, **49,** 321–328.

WIDDER, D. V. (and GERGEN, J. J.)

On Taylor's Series Admitting the Circle of Convergence as a Singular Curve, **50,** 139–146.

WIENER, NORBERT

Note on a New Type of Summability, **45,** 83–86.

WILCZYNSKI, E. J.

On Systems of Multiform Functions Belonging to a Group of Linear Substitutions with Uniform Coefficients, **21,** 85–106. (Errata and Addendum, **21,** 387.)

On Linearoid Differential Equations, **21,** 354–366.
On Continuous Binary Linearoid Groups, and the Corresponding Differential Equations and Λ Functions, **22,** 191–225.
Transformation of Systems of Linear Differential Equations, **23,** 29–36.
Invariants of a System of Linear Partial Differential Equations, and the Theory of Congruences of Rays, **26,** 319–360.
On a Certain Completely Integrable System of Linear Partial Differential Equations, **36,** 231–260.
Geometrical Significance of Isothermal Conjugacy of a Net of Curves, **42,** 211–221.

WILLIAMS, FRANK B.

Curves on Quintic Scrolls, **34,** 421–448.

WILLIAMS, K. P.

The Laplace-Poisson Mixed Equation, **44,** 217–224.

WILSON, ALBERT HARRIS

The Automorphic Transformations of the Binary Quartic, **33,** 29–36.
The Canonical Types of Nets of Modular Conics, **36,** 187–210.

WILSON, WALLACE ALVIN

On the Structure of a Continuum, Limited and Irreducible between Two Points, **48,** 147–168.

WILSON, W. HAROLD

On a Certain General Class of Functional Equations, **40,** 263–282.

WINGER, R. M.

Self-Projective Rational Curves of the Fourth and Fifth Orders, **36,** 53–78.
Self-Projective Rational Sextics, **38,** 45–56.
On the Satellite Line of the Cubic, **42,** 129–135.
Self-Projective Rational Septimics, **47,** 207–223. (Correction, **47,** 303).

WONG, BING C.

A Three-Dimensional Quartic Variety in Four-Space, **49,** 383–388.

WRIGHT, J. EDMUND

The Differential Invariants of Space, **27,** 323–342.
Lines of Curvature of a Surface, **29,** 295–304.
The Ovals of the Plane Sextic Curve, **29,** 305–308.

The Differential Equations Satisfied by Abelian Theta Functions of Genus Three, **31,** 271–298. (Errata, **31,** ii).
Differential Equations Admitting a Given Group, **31,** 299–302.

WRINCH, DOROTHY M.

On Mediate Cardinals, **45,** 87–92.
On the Asymptotic Evaluation of Functions Defined by Contour Integrals, **50,** 269–302.

YOUNG, ARCHER EVERETT

On the Problem of the Spherical Representation and the Characteristic Equations of Certain Classes of Surfaces, **32,** 37–51.
On Certain Orthogonal Systems of Lines and the Problem of Determining Surfaces Referred to Them, **34,** 373–382.
On the Determination of a Certain Class of Surfaces, **39,** 75–85.

YOUNG, GEORGE PAXTON

Principles of the Solution of Equations of the Higher Degrees, with Applications, **6,** 65–102. (Errata **7,** iv).
Resolution of Solvable Equations of the Fifth Degree, **6,** 103–114.
Solution of Solvable Irreducible Quintic Equations without the Aid of a Resolvent Sextic, **7,** 170–177.
Solvable Irreducible Equations of Prime Degrees, **7,** 271–278.
Forms, Necessary and Sufficient, of the Roots of Pure Uni-serial Abelian Equations, **9,** 225–277.
Solvable Quintic Equations with Commensurable Coefficients, **10,** 99–130.

YOUNG, J. W. A.

On the Determination of Groups whose Order Is a Power of a Prime, **15,** 124–178.

YOUNG, JOHN WESLEY

On a Certain Group of Isomorphisms, **25,** 206–212.

YOUNG, JOHN WESLEY (and VEBLEN, OSWALD)

A Set of Assumptions for Projective Geometry, **30,** 347–380.

YOUNG, MABEL M.

Dupin's Cyclide as a Self-Dual Surface, **38,** 267–286.

YOUNG, W. H.

On the Analytical Basis of Non-Euclidian Geometry, **33,** 249–286.

ZARISKI, OSCAR

On a Theorem of Severi, **50,** 87–92.

On Hyperelliptic θ-Functions with Rational Characteristics, **50,** 315–344.

ZELDIN, S. D.

On the Structure of Finite Continuous Groups with a Single Exceptional Infinitesimal Transformation, **44,** 204–216.
